

# OZONE

## AFFORDABLE PROTECTION FOR DAIRIES

Priced at only **\$595**, **STERI-SPRAY** provides dairies with a cost effective solution to implement first rate hygienic practices for the production of high quality microbiologically safe milk.

See how your dairy can improve the quality of your milk production and herd health for only **\$595**.

### REAL BENEFITS

- **TEAT WASH & DISINFECTION**  
A quick 5 second spray will disinfect teats prior to milking to minimize bacterial infection
- **HOOF SPRAY**  
Eliminates diseases such as acute coliform mastitis and bacterial infection
- **ESSENTIAL HYGIENE**  
Removal of milk residues and Biofilm bacteria from stainless steel surfaces, canisters and pipelines
- **MILK PURIFICATION**  
Avoid the pitfalls of high temperature disinfection. Ozone treatment was shown to reduce the number of psychrotrophs by more than 99%
- **CHEESE PRODUCTION**  
Ozone will prevent mold growth during ripening reducing mold spore counts up to 94%
- **WASTEWATER TREATMENT**  
Water plays a pivotal role in the dairy industry. Ozone was shown to decrease the initial fat content of 80-230 mg/L by 96 to 98% enabling the treated effluent to be discharged into natural watercourses.

### PROGRAM DYNAMICS FOR DAIRIES

#### 50% PROMOTIONAL DISCOUNT ON A PROFESSIONAL HAND WASH STATION
