

ABS takes great pride in delivering you a high quality product so please follow the steps below to ensure your system is properly prepared before turning on your computer.

## STEP 1

### Remove packaging foam

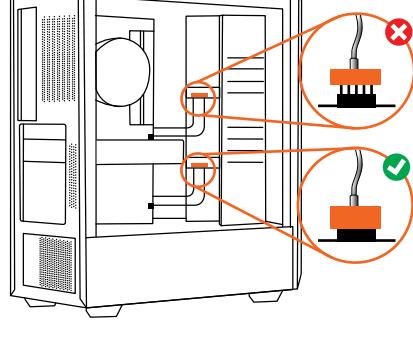

Remove screws from the left side panel.  
Then remove the panel.

Carefully remove protective foam.  
**⚠ DO NOT turn on your computer before removing foam.**

## STEP 2

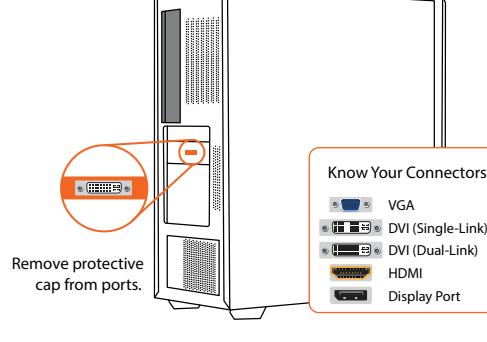

### Inspect your PC for loose wires

Ensure all component cables are securely connected (some may loosen during shipping). Put the left side panel and screws back on.

## Connect to your monitor

## STEP 3

Connect your monitor cable to an available video port on your graphics card.

## STEP 4

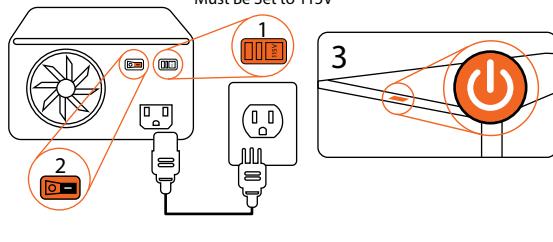

### Connect your peripherals

Connect your keyboard, mouse, audio, and network to the matching ports on the motherboard I/O by connection type or color. Any included network adapters or antennas will be in the motherboard box.

## Power on your ABS System

## STEP 5

Use the included power cord to connect your power supply unit (PSU) to a wall outlet or surge protector. Turn the power supply switch on before pressing the front power button.  
NOTE: International customers will need to set the PSU from 115v to 230v
