

# How many wagons will you have tomorrow?

Lack of transport capacity won't cause your schedule to go off the rails ever again.

Rail transport is dependent on fleet availability. Without railcars, planned transports cannot be carried out. With Eversens' Capacity Forecast, handle demanding train schedules without missing a beat.

- Save time on physical inventories with real-time data integration.
- Fine-tune your wagons availability depending on types.
- Anticipate and resolve asset shortage.
- Make sure you have enough railcars to fulfill your orders on time.

## Automate inventory

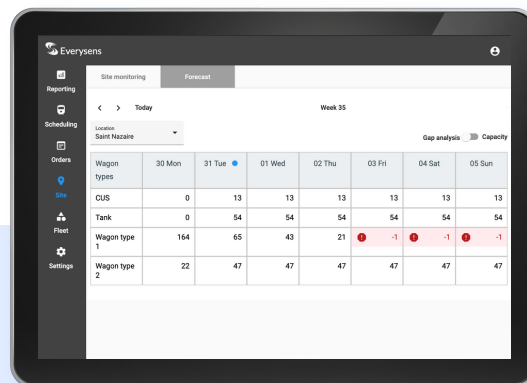

View live inventories on your various sites, for at-a-glance access to **real-time asset availability** information. Get the data from Eversens, or sync it with your fleet management system.

Last inventory on Saint Nazaire

Wagon type	Last update date	Wagon count
CUS	8/31/2021	13
Tank	8/31/2021	54
Wagon type 1	8/31/2021	65
Wagon type 2	8/31/2021	47
Total	8/31/2021	179

## Let the forecast work its magic

We combine real-time inventory, ETA information and planned shipments to get you the most **reliable** and up-to-date information about your railcars' future availability. Detect **imbalances** in advance, and view the **affected transports** in one click.

## Improve your schedule on-the-go

Good data is recognized by its applications. While planning your trains, get immediate **alerts** about your wagons' forecasted availability. Take **corrective measures** as you go, to build a **foolproof schedule**.
