Sustainable Living

As an organisation, Organo Et School's purpose is nurturing a learning environment for all stakeholders where inclusive holistic eco-living is celebrated.

Organo Et School

Monthly Bulletin

Remembering 2020 in January

Organo Et School's purpose is nurturing a learning environment for all stakeholders where inclusive holistic eco-living is celebrated.

As this roller coaster year draws to a close, a fresh new year begins with life returning to normalcy. Quiet reflections, firm resolves, promising new habits, shedding out the excesses, making those tiny little changes that is truly sustainable.

As we gear up to usher in 2021 and say goodbye to 2020, here's a look at the year gone by

Relaunch of Organo Et School

With its relaunch Organo Et School continues to aim at responsible and sustainable living made easy, by creating an experiential learning platform for educating and helping people make sustainable and mindful choices. Though we firmly believe in experiential learning being the most desired form of learning, however during such times of uncertainty we continued to empower all our stakeholders in creating and adopting holistic Eco-living.

The spirit and intent of Organo Et School program is to encourage individuals to adopt an Eco-friendly lifestyle by teaching them to connect and be a part of nature, to grow their own food, by inspiring them to look for sustainable sources of energy, contributing to the holistic well-being of the Eco-system.

Intent of Organo Et School

Nurturing a learning environment for all stakeholders where inclusive holistic Eco-living is celebrated; Organo Et School aims at spreading awareness by educating Schools, Communities and Corporates at large to engage in helping individuals to make mindful decisions, spurring them on to realize that they too can make a difference to their surroundings.

Participants are encouraged to explore the structures behind our day-to-day lives to understand their scope and impact. They are empowered to be mindful of the challenges that are faced by those responsible for that infrastructure. Our sessions are conducted on various venues including Organo Naandi, Schools, Corporates and Communities. During this Pandemic we have moved to the online mode to stay connected. Our online sessions and workshops are built to offer active learning experiences, which can include frequent opportunities for participants to discuss, share experiences, ask and answer questions as well.

Through contests we stay connected

Sustainability Day Contest

Organo Et School stayed connected and interacted with its audience through social media contests that unleashed the creative side of theirs. On this "Sustainability Day", Organo Et School invited creative and innovative minds to participate in "Slogan Time" and "My Upcycle Project" contests. . It was truly inspiring to have children participating and sharing their incredible thoughts. We value each connect built through this communication and collectively we can continue to inspire each other in many ways through this journey of sustainability.

Winners were sent a sustainable starter kit.

Children's Day Contest

Children can be wonderfully creative and their work inspiring. And so are parents, too. On the occasion of Children's Day, Organo Et School welcomed these young children and parents to share their fondest memories, photos, write-up, painting, and more by participating in our "Children's Day Contest ". The contest was open to children of all ages up to 16 years.

Winners were sent a sustainable starter kit.

Online workshops for Sloka School

Evidence shows that children are particularly receptive to the topic of sustainability and most likely to adopt long-lasting changes to their behaviour. It is a crucial part of understanding the world around them. Through online channel Organo Et School connected to students of Sloka and facilitated eight workshops last year. These workshops were carefully crafted to highlight that sustainability is a topic that can support all areas of curriculum learning.

We covered topics for Energy, Food, Earth, People and Lifestyle. Students learnt basics of kitchen gardening, how to grow microgreens, its benefits, managing waste, segregation of waste, compost making and decluttering study space. The resources workshop challenged children through game play, looking at how they can reduce, reuse, recycle and repurpose.

Talks with our Experts

We were fortunate enough to talk to some industry experts, high level consultants, and researchers; we have documented our conversation so that you can reap the most benefits from accessing expert insights.

Meet one of our experts Mr. Indrasen Bollampally, founder of Four Solar Energy Systems Pvt Ltd who talks about each of the aspects of Solar Power Generation. Mr. Bollampally was kind enough to answer all our questions.

Organo Et School gets featured

We are delighted to be covered by “The Organic Magazine” and “Prakati”

We were contacted by both “The Organic Magazine” and “Prakati” as they wanted to do an article about us on why we do what we do and what workshops we offer for schools, communities and corporates.

We have admired The Organic Magazine and Prakati, as they consistently showcase all sustainability and planet-friendly related aspects, a big Thank You to the amazing team.

Sustainable Lifestyle Practices

Minimalism is not the lack of what you need, it's simply the perfect amount of what you need", a balance between what you want and what you need. Be it mindful shopping, planning a zero waste wedding, disinfecting and sanitizing at home, practicing slow food, making your own compost, or decluttering your wardrobe. Learn easy steps towards sustainability- Every step makes a difference. The more of us that step up, the bigger the difference we'll all make.

Looking ahead to 2021

COVID-19 has made us all aware how our ability to build consensus and act collectively has been undermined. More than anything, the pandemic has shown us how interconnected, and interdependent, our economic, natural and social systems are.

As we look ahead to recovery and growth, it is clear that sustainable prosperity requires each of us to collaborate actively towards solutions for people, planet and prosperity that have a holistic approach.
