

Murdoch Extending Roof Ladders

The Product

These heavy-duty roof ladders are manufactured using industrial strength aluminium, with oval section stiles and heavy-duty non-slip rungs and incorporate a heavy-duty ridge hook. To prevent any damage to the roof they have rubber covered bearers bars to distribute weight evenly. Unlike most roof ladders available these ladders are manufactured in the UK and are tested to a maximum safe load of 175kg.

Specification

- 2 Part Extending Ladder.
- Strong oval box section stiles.
- Serrated round rungs at 300mm centres.
- Ridge hooks constructed from 25mm square tube with 100mm diameter running wheels.
- Bearer bars fitted with protective PVC sheathing.
- 175KG load rating
