What are cookies?

A cookie is a small text file that is placed by a website's server in your computer's browser or on your mobile device when you consult the website. The cookie contains a unique code that makes it possible to recognize your browser during visits to the website (a so-called "session" cookie) or during subsequent, repeated visits (a so-called "permanent" cookie). Cookies can be placed by the server of the website you visit or by partners with whom this website cooperates. The server of a website can only read the cookies that it has placed itself, it has no access to other information located on your computer or mobile device. Cookies are stored on your computer or mobile device in the folder of your browser. The content of a cookie usually consists of the name of the server that placed the cookie, an expiry date and a unique number code. It does not contain any personal data.

Cookies generally make interaction between the visitor and the website easier and faster and help the visitor to navigate between the different parts of a website. Cookies can also be used to make the content of a website or the publicity on a website more relevant to the visitor and to adapt it to his personal taste and needs.

Hypercharge makes use of the following cookies:

1. Necessary cookies

These cookies are indispensable in order to visit the Website and use certain parts of it. For example, these cookies allow you to navigate between different parts of the Website. If you refuse these cookies, certain parts of the Website will not work or will not work optimally.
