

## Cyber Risk & Compliance Advisory Services

### Cybersecurity Maturity Model Certification (CMMC)

If you do work for the Department of Defense (DoD) CMMC applies to your business. New security standards require all contractors to secure government data and the contractor computing environments within which the information is stored or processed. CMMC is a prerequisite to doing business with the DoD. It builds upon the DoD's existing DFARS 252.204-7012 regulation regarding the protection of controlled unclassified information (CUI).

**HumanTouch, your cyber risk management partner.**

### CMMC Advisory Services

We help your organization create a balanced alliance of compliance and security, commensurate to your business size and structure, to manage your cyber risk and compliance with regulatory standards

#### **Develop and operationalize** a tailored information Security Risk Management program:

- Aligns to requisite compliance framework(s)
- Implements internal security measures to protect government information and your company's integrity and reputation.

#### **Maintain** the path to Compliance that is scalable and adaptable

#### **Implement** a cybersecurity capability that continuously detects and eradicates threats

### CMMC Compliance Simplified

We streamline the entire compliance process for your organization and establish a secure internal structure to help operationalize your on-going cyber risk management obligation

#### **Robust Compliance Management Platform**

Cloud based, secure, and centralized to create one place to safely house your compliance information and artifacts

#### **Automated Workflows**
