

Document Delivery Service Made Easy & Secure

Paris Deliver is an **innovative document delivery** service that enables organizations to seamlessly send digital and physical communication to their customers from on-demand and small batches to high-volume transactional communications.

We deliver to the right person, in the right channel, at the right time.

Automate Document Delivery While Reducing Cost

As organizations look to reduce costs, they are evaluating their in-house operations and technology for automation opportunities. Sending customer communications like invoices, statements, policies, letters, and other correspondence can be expensive and labor-intensive.

Document Delivery as a Service with Paris Deliver leverages a leading-edge SaaS solution that enables organizations to securely deploy digital and physical communication to their customers through various channels - while reducing their costs by up to 30%.

Benefits

-  **Simply Turn on Digital Delivery**
-  **Control & Flexibility**
-  **Available 24/7/365**
-  **Secure & Trackable**
-  **No Downtime. No Equipment Leases**
-  **Pay only for what you use**

Scalable Document Delivery

The ability to seamlessly deliver on-demand, small batches, and high-volume transactional communication allow for project scalability.

Secured Document Delivery

Documents are encrypted and protected using the latest technologies and business processes to ensure secure delivery.

Delivery Channel Flexibility

Deliver your communications through any combination of channels, including **physical mail, email, SMS, and much more.**

API Integration to Business Applications

Connect existing applications to integrate seamlessly to ensure that document delivery is handled automatically.

SOC2 & GDPR Certified

Intuitive Monitoring and Workflow

Defined user roles and permissions allow users, managers, or third parties to work securely and provide visibility to manage different parts of the delivery process.

Delivery events, such as when mail is delivered, emails opened, or an SMS failure is all built into the service, completing the cycle of delivery communications to your customers.

Seamless Printing for End-Users

The Paris Deliver Previewer UI allows users to print remotely, directly from their computer, or through enterprise applications (CRM, ERP, etc.) to have their documents delivered to the channel they choose.

What is Paris Deliver

Paris Deliver is a truly revolutionary service that allows you to control the way you communicate with your customers. Paris Deliver takes your transactional documents such as invoices, statements, letters and marketing materials and lets you deliver it physically through the mail or electronically through any digital channel without any investment in print rooms or other communications infrastructure.
