
Paper Prototyping

What you'll do

Using the sketches and user flow you just created, you'll build a clickable/tappable prototype that you'll use to test with your user.

Learning outcomes

Rapid prototyping using paper and [POP by Marvel](#)

Step-by-step instructions

1. Download POP to your smartphone. Watch this [17 second POP overview](#). For a more detailed tutorial, watch this [POP tutorial](#).
2. Using POP, take pictures of your sketches in the printed out **User flow** templates and link the screens together with hotspots.

Up next

Once your prototype has been built, the next step will be to validate the design with your user. In the next exercise, you'll build a usability test script and test your paper prototype with your user.
