Nursery

509-547-2254

INSIDE: Tree Reference Guide

Garden Gate Nursery provides quality, wholesale trees in pots to nurseries, garden centers and landscapers. We are located in Eastern Washington. We have over 15,000 trees in

stock in over 100 different varieties. Inside you will find a complete listing of our products with an easy to read quick reference chart for the tree's characteristics.

Our availability list is located on our website at www.gardengatetrees.com. We also mail out

copies in addition to posting it on our website. If

you would prefer to receive a paper copy, please let us know and we will be glad to send you a copy along

with our recent catalog. We strive for consistent quality in every tree. Our trees are uniform in shape and branching, receive precise fertilizer to ensure healthy growth, and are continuously

inspected for any potential problems. Our business is to provide you with quality trees and we make every effort to do just that.

We Deliver

We have various types of delivery trucks that are available for deliveries throughout the Pacific Northwest and Montana. We routinely deliver loads to the Spokane Area. In order to minimize your shipping costs, we strive to ensure our trucks are near capacity by combining deliveries when possible.

One detail that we closely observe during planting is root circling. The circling of roots starts early in the trees growing life, and if left unattended, it will strangle the tree 3 to 5 years after it is planted in a landscape. Our planters take particular precautions to avoid this problem.
