Interested in Leading Digital Finance Transformation (DFT)?

Valuesoft is offering an opportunity for you to help shape your organization's DFT journey.

The program consists of a Three-Day Virtual workshop followed by series of follow-on activities.

1.0 Three Day Virtual Workshop

You will gain a working knowledge of Automation and Machine Learning in Finance and Accounting.

Learning objectives:

1. Learn process design and documentation.
2. Learn how to identify and evaluate the most logical processes for automation.
3. Build your first Robot.
4. Learn how to address automation governance
5. Learn how to address organizational readiness and change management

2.0 Automation Opportunity Qualification

- Post workshop identification of process automation opportunities within function or department into an Automation Ideation Hub.

3.0 Business Justification and Prioritization

- Leadership reviews and select projects submission from Automation Ideation Hub.

4.0 Solution Implementation

- Develop implementation plan and execute.

* Valuesoft can support your implementation effort with the placement of trained Robotics Process Automation interns with your organization.
