PHILADELPHIA GEAR, A TIMKEN BRAND

Sr. Metallurgist

Product development

- Interfaced with customers to determine product requirements.
- Determined if there were preexisting products that met all the standards and requirements or if new solutions were necessary.

Led root cause analysis

- Facilitated investigations and user research to identify the source of problems and pain-points arising in processes.
- Created and instituted solutions which prevented problem reoccurrence and, if necessary, address initial ramifications.
- Conducted follow-up testing and research to determine if the solutions created were successful.

Contributed to a small team focused on internal lean projects

- Redesigned shop floor layout and workspaces to make them more usable and to increase productivity and safety.

EDUCATION

Apr 2019
Jan 2020

CAREERFOUNDRY

Certificate in User Experience Design

Certificate in Front End Development for Designers

Intensive project-based training program with a focus on user experience design, user interface design and frontend skills for designers.

- Designed an app concept for finding tattoo artists and tattoo inspiration. Performed user research and analysis, created wire frames and prototypes, and conducted user testing.
- Designed and developed a portfolio website from scratch using basic skills in HTML5, CSS and JavaScript.
