

## ***WARRANTY INFORMATION – STAINLESS STEEL SINKS***

### **Warranty Conditions**

- By installing the sink, the owner accepts that the product is free of blemishes or imperfections including scratches, damage and discoloration.
- The sink installation is the responsibility of the customer and we recommend it be done by a qualified installer and all plumbing be done by a licensed plumber.
- Sink warranty starting from date of purchase of product, providing the product has been installed in accordance with the manufacturer installation instructions and used in a normal residential application.
- The warranty only applies if a document proving the date of purchase is produced.
- Any faults caused by defective production or materials will be repaired/replaced, at the sole discretion of ECT, either by repairing faulty components or by replacing the whole product with the same or an equivalent model where the balance of the warranty period from the original date of purchase will take effect.
- This warranty does not cover scratching, chipping, spotting, discoloration or tampering with.
- The warranty does not cover product removal or re-installation costs, visits and calls of specialized technicians, costs borne by the customer due to the unavailability and/or non-use of the product.

### **Warranty Period**

All ECT Stainless Steel sinks are covered by a **25-year** Manufacturer's warranty that complies with the Competition and Consumer Act (2010) in Australia. The warranty is not transferable and covers the original purchaser of the product used in a Domestic/Residential setting and maintained in accordance with cleaning instructions. **25-year** warranty is for sink only, other accessories and waste fittings are covered for 12 months.

### **General Cleaning**

It is recommended to clean the sink daily to avoid build-up of soap or mineral deposits, as these tend to have an adverse effect on the appearance of the product. For daily cleaning use an ordinary mild detergent and soft cloth to rinse and dry the sink. Allowing water or cleaners to evaporate on metal will negatively impact the look of the sink. To avoid this, it is important to dry the sink after each use.

- To avoid unwanted build-up, it is recommended to dry your sink after each use.
- Soft abrasive cleaners may be used when necessary (Blue Scotch-Brite Pads). Strong abrasive cleaners will scratch and dull the surface (Green Scotch-Brite Pads).
- Steel soap pads, steel wool, or wire brushes should never be used; particles can adhere to a stainless steel sink surface and will eventually rust.
