

Part Number | TRITON 24 pack, Brass Manifold with post sintered flexible pigtailed
CT24AGA-RP24-XXXPS

The ProRack TRITON is our largest and most robust high pressure gas cylinder cradle boasting 24 cylinder capacity. The TRITON's heavy duty design is utilized for offshore, large remote cylinder storage banks, and just about any application requiring high volume gas requirements. The TRITON is manufactured with extra heavy materials and supplied hot dipped galvanized for years of service life without corrosion. Manifold systems are available in brass and stainless steel with pressures up to 6000PSI.

Triton Series Cradle System Features

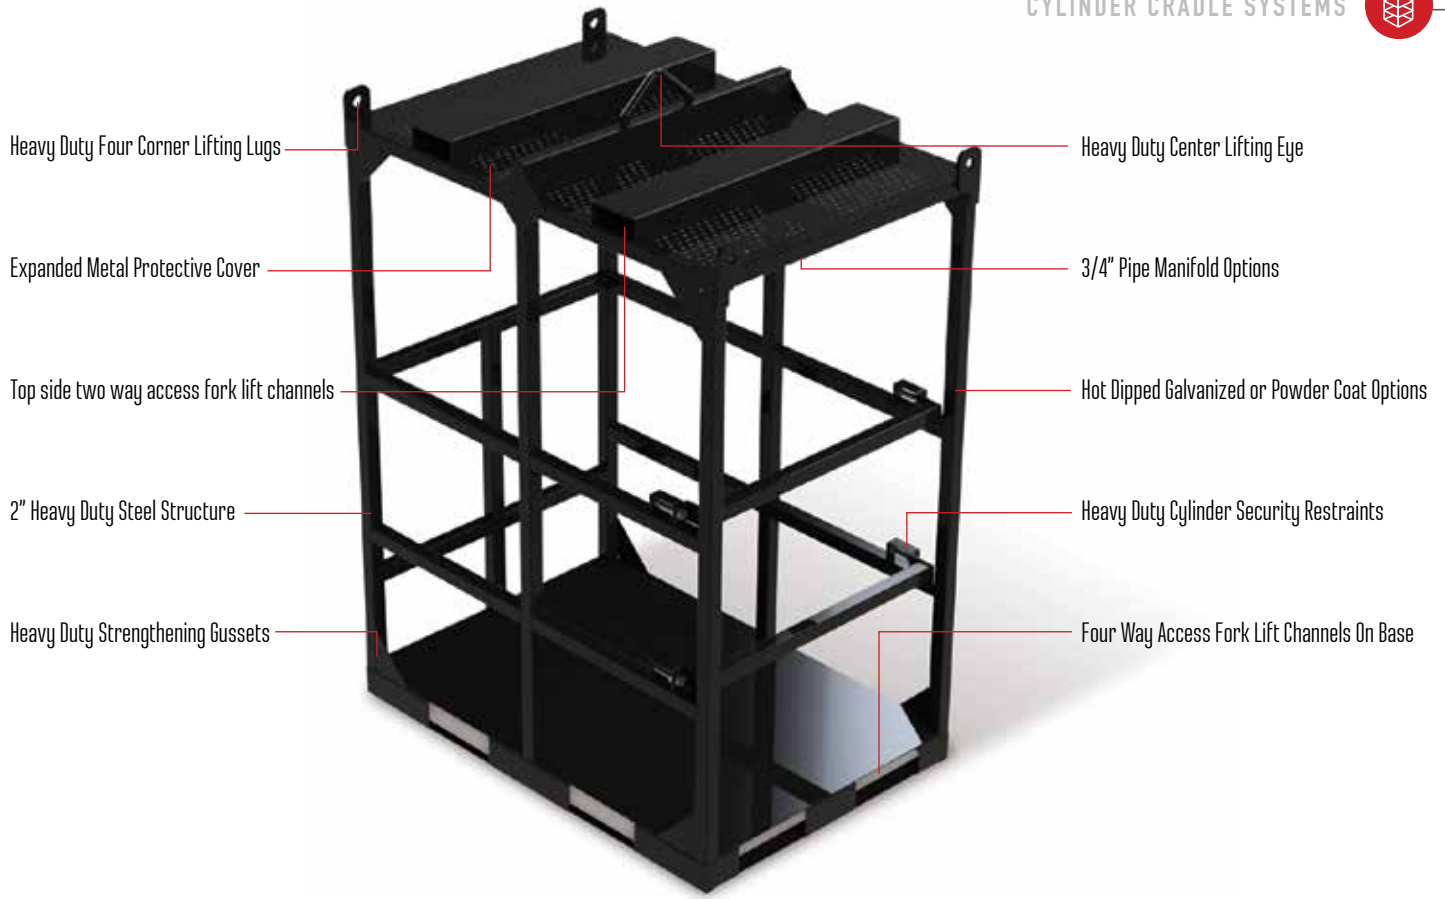

- 24 Cylinder capacity
- Heavy duty four corner lifting lugs
- Center lifting eye
- 6 way lift truck pockets access
- Expanded metal protective cover
- Designed with 2" Steel Structure
- Heavy duty gussets add superior strength
- Hot dipped galvanized or powder coat finish
- A variety of MEDUSA manifolds are available to meet all applications.
