

Checklist of the Top DeFi Projects

This is an extra resource to go along with the original article:

[Why DeFi Adoption is Set to Skyrocket](#)

Use the following checklist to discover opportunities to invest in the rapidly growing DeFi ecosystem.

- Maker** is a decentralized credit platform that supports a stablecoin, Dai, pegged to the U.S. dollar.
- Compound** is an algorithmic money market protocol on Ethereum that lets users earn interest or borrow assets against collateral.
- Aave** is an open source non-custodial protocol on Ethereum for decentralized lending and borrowing.
- SushiSwap** is a fully decentralized on-chain protocol for exchanging tokens through a process of automated market making.
- Curve Finance** is a decentralized exchange liquidity pool on Ethereum designed for extremely efficient stablecoin trading.
- Uniswap** is a fully decentralized on-chain protocol for token exchange on Ethereum that uses liquidity pools instead of order books.
- InstaDApp** is a smart wallet with an intuitive interface built on top of popular DeFi projects, like Maker and Compound.
- Synthetix** is a decentralized platform on Ethereum for the creation of Synths to track real world assets.
