Information for the Medical Practitioner - Serological Clearance for Combatants contesting WBF Amateur Masters contests

(Contains information for Medical Practitioners and Pathology Service providers in relation to the issuing of medical/serology certificates)

Combatants wishing to contest a WBF Amateur Masters contest must provide a Serological Clearance.

A serological clearance is a certificate by a registered medical practitioner or a person who provides a pathology service that:

(a) the medical practitioner or person is of the opinion that a specified person

is not capable of transmitting a medical condition or disease; and

(b) the opinion is based on the results of blood tests or other tests carried out on a date specified in the certificate.

The medical conditions or diseases specified by regulations are:

- HIV
- Hepatitis B
- Hepatitis C.

In order to complete the Serology certificate, the Medical Practitioner or pathology service provider must order the following screening tests to be conducted:

- HIV combined antigen- antibody (HIV Ag/Ab),
- Hepatitis B surface antigen (HBsAg),

and

- Hepatitis C antibody (HCV Ab).

SEROLOGY CERTIFICATE

The certificate must state the date of the test and may only be completed if based on the results of the above tests and the issuer is of the opinion that the person is not capable of transmitting a medical condition or disease specified.

The WBF Amateur Masters Division (AMD) does not require the results of the pathology tests. A Serological Clearance for completion is attached for your use and must be current when presented to compete.

In the event that any of the screening tests are positive and the medical practitioner is of the opinion that the specified person is capable of transmitting the specified disease / medical condition then the serology certificate must not be issued.

RENEWAL OF SEROLOGY CERTIFICATE

Whist ever a Masters boxer is competing and contesting WBF Amateur Masters contests, Serology clearances must be obtained every 6 months.
