

CT GLOBAL SOLUTIONSSM
Make Every Decision CountSM

CT GLOBAL SOLUTIONS & SAS

PLAN WITH CERTAINTY.
ANALYZE WITH ACCURACY.
INCREASE REVENUE & PROFITS.

Forecasting & planning drive the integrated business planning process (IBP). Even the slightest improvements can have major effects on revenue, costs, inventory, profit, customer satisfaction and efficiency.

Are your current solutions and structure providing you with the most value?

Welcome to the **Gold Standard** in Supply & Demand Planning Optimization.

Our Solution offers an integrated suite of forecasting, analysis, visualization, reporting and optimization modules built on a common base. SAS will allow you to quickly and easily visualize market signals to predict future outcomes using what-if scenario analysis. You can automate inventory management process using distribution models and optimize your business processes and decision making.

- Increase forecasting precision so you can plan with certainty
- Optimize the supply chain by improving service levels and reducing inventory for a significant gain in revenues and ROI
- Analyze and Optimize decisions that will drive profitability and decrease costs aiding your Revenue Planning
- Boost visibility to better manage risk, prioritize actions and forecast the demands of your business
- Use a unified framework that takes in all factors into account from external items like weather to internal factors like staffing or capacity
- Identify patterns and insights related to logistics, sales, pricing and promotions
- Reduce time and effort to produce reports while significantly increasing scalability
- Determine New product forecasts based on similarities from previous rollouts.
