

Charge Enterprises and Naki Power, Europe's Largest Power-Sharing System, to Bring Power Sharing to North America

The popular portable charger company shares the same vision for the future of mobility and power sharing, with plans to expand reach alongside Charge in North America

PARIS – January 15th, 2021 – [Charge Enterprises Inc.](#) (OTC PINK: CRGE), a global business with capabilities and talent focused on connectivity in communications, last-mile delivery, and micro-mobility infrastructure, today announced a minority equity investment and had further executed a term sheet for exclusive rights to North America with Naki Power, the largest power-sharing system in Europe.

Naki Power is the largest power-sharing system in Europe operating in five countries with 1,500 active power stations where consumers can rent portable chargers. The company is changing the way people charge their electronic devices, offering powerbank rentals in bars, restaurants, airports, public transport hubs, etc., that offer freedom and convenience for people in cities, just like other sharing economy services such as electric bike and scooter rental. Naki Power has solidified itself in the European market as a viable means to charge the many different electronics used in today's world, including cell phones, wearables, or other products such as portable speakers. Users are not required to supply their own charging cable and, with multiple outputs, the portable chargers are compatible with almost every electronic device available today.

Charge's vision is to bring more power-sharing options to its customers by launching Naki Power stations across North America with service beginning in the third quarter 2021. After solidifying our presence in North America, Naki Power and Charge plans include expanding the service to other countries..

“This new partnership is important for us. Naki Power has such a great foothold in Europe, and it matches our last-mile solutions and charging strategy,” said Andrew Fox, founder and CEO of Charge Enterprises Inc. “We have invested with Naki Power because we trust its forward-thinking, the execution of the product, and more importantly the quality of the product and the team behind it.”

“The team at Charge understands our values in shared power, and our work together will make it possible to expand Naki Power’s services into the United States,” said Zaccaria Aghemio, founder and CEO of Naki Power. “Together, we’ll continue to build safe, reliable infrastructure for today’s mobile age.”

Naki Power initially launched in Belgium, and it has seen significant growth in the European market. A recognized brand in the world of power sharing and batteries, this co-branding will help both brands raise their visibility in markets around the world.

About Charge Enterprises Inc.

Charge Enterprises Inc is a portfolio of global businesses with the vision of connecting people everywhere with communications, infrastructure and transportation. Trading under the Ticker: CRGE

With three distinct divisions.

- Charge communications, with a strategy offering Unified Communication as a Service (UCaaS) and Communication as a Platform Service (CPaaS), providing termination of both voice and data to Carriers and Mobile Network Operators (MNO’s) globally for over 2 decades.
- Charge Infrastructure, addresses last mile micro-mobility by offering patented, unique and problem-solving infrastructure solutions to cities globally
- Charge Transport, with a strategy of building out new delivery routes globally, adding electrification and autonomous capability to deliver 10’s of millions of parcels a day whilst constantly innovating and utilising our shared resources.

Our strategy is to do the unglamorous part of connecting your phone calls, delivering your packages, and powering micro-mobility.

We operate our current business through a number of subsidiaries which we have recently acquired and/or formed.

About Naki Power.

Naki Power is changing the way people charge their electronic devices.

With Naki, you can charge your phone and other devices, anywhere, anytime, on-the-go, without having to leave your device behind or worry about cables. Our powerbank rental offers freedom and convenience for people in cities, like other sharing economy services such as electric bike and scooter rental. Naki Power stations can be found in cities across Europe, in bars, restaurants, hairdressers, airports, public transport hubs, shopping centres, fitness centres and hotels. We aim to create a world where people are freed from phone battery constraints,

can easily charge their electronic devices on-the-go and no longer worry about being cut off from their phones and essential apps. <https://nakipower.com/en/>
