Onboarding

- Imagine a world where...
- Traders can register with the DA market online (or offline)
  - Risk of fraud, identity and account fraud protection checks
  - DA Transparency: TRC are readily accessible, easy to understand and can be signed electronically

Product Collaboration

- Imagine a world where...
- Customers can submit a proposition and identify the right trader to connect with. It's easy for the trader to accept
  - Traders can propose their own products and services, manage and maintain their own product and pricing
  - Customers can see the same information about the product as the trader
  - Customers can create their own products and services to trade
  - Customers can create their own products and services to trade

Binding & Pricing

- Imagine a world where...
- Customers can submit a proposition and identify the right trader to connect with. It's easy for the trader to accept
  - Traders can propose their own products and services, manage and maintain their own product and pricing
  - Customers can see the same information about the product as the trader
  - Customers can create their own products and services to trade
  - Customers can create their own products and services to trade

Offering Capacity

- Imagine a world where...
- The trader can submit capacity to offer
  - Capacity is offered to the market to trade
  - The trader can create their own products and services to trade
  - Customers can see the same information about the product as the trader
  - Customers can create their own products and services to trade

Overnight

- Imagine a world where...
- Most of the offering capacity and individual trade variation checks are automated and occur in real-time
  - Information provided is stored in a single place and accessible to all who need to see it, when they need it
  - Checklisting checks are notified by email, allowing the trader to act on them
  - This is a self-supported marketplace

Rating

- Imagine a world where...
- Risk is fully assessed in real-time and can be used to provide offering capacity for an existing product or create new products
  - Customers can see the same information about the product as the trader
  - Customers can create their own products and services to trade
  - Customers can create their own products and services to trade

Claims Handling

- Imagine a world where...
- Proposition, Policy and Claims data is contrasted to help find errors and discrepancies in those that need to be corrected
  - Risk is fully assessed in real-time and can be used to provide offering capacity for an existing product or create new products
  - Customers can see the same information about the product as the trader
  - Customers can create their own products and services to trade
  - Customers can create their own products and services to trade

Funding

- Imagine a world where...
- It is possible to receive funds automatically
  - It is possible to receive funds automatically
  - It is possible to receive funds automatically
  - It is possible to receive funds automatically
  - It is possible to receive funds automatically
