Imagine a world where...  
• Coverholders can upload a proposition and identify the right broker to connect with in 10 minutes  
• Most of the company and individual level validation checks are automated and occur in real time  
• DA membership / TACs are readily accessible, easy to understand and can be signed electronically

Imagine a world where...  
• Coverholders can upload a proposition and identify the right broker to connect with in 10 minutes  
• Brokers can easily identify the right parties with experience, strength and interest in the type of proposition and bring them into the conversation to collaborate.  
• All funds in claim in real time, using up to date information on parties across the entire DA market

Imagine a world where...  
• Companies are invited to consider investing via an entire tool  
• Capacity is shared using workflow to control how a proposition moves from one party to another  
• Follows can see the same information as seen by the Lead  
• Coverholders no longer have to provide the same information several times or significantly different information to individual follows  
• It's easy to bring all parties into a conversation about this

Imagine a world where...  
• The need to re-confirm capacity annually is gone  
• Reconfirm capacity takes a few days, not months to arrange  
• The new capacity provider has access to the latest set of the information as used by the Lead and follows previously  
• Required information is refreshed when available, only once and is visible to the capacity providers in real time

Imagine a world where...  
• Most of the ongoing company and individual level validation checks are automated and occur in real time  
• Information provided is stored in a single place and accessible by who needs to see it, when they need it  
• Outstanding checks are notified by exception, removing the need to undertake the entire process as a checklist exercise and instead only spend time on what is required

Imagine a world where...  
• Each party is awarded a health score/rating and we use this to inform decision making when choosing to connect with a party to bring a product to market, opt to provide ongoing capacity for an existing product or decide what Compliance checks are required post-bro flow

Imagine a world where...  
• Proposition, Policy and Claims data is centralised in near real time and accessible to those that need to see it whenever they want  
• Rules automation and workflow is used to ensure that the Claims process runs smoothly  
• Financial reporting activity of TPAs is visible to who needs to see it and can be used as part of decision making when bringing a proposition to market

Imagine a world where...  
• It is possible to reconcile funds automatically  
• It is possible to produce reporting on demand to evidence movement of funds  
• Discrepancies are reported by exception for investigation  
• Your financial accounting systems were able to connect and consume this information via APIs without the need for manual intervention
