

**Practicality and
Versatility in spades**

Wedglock **SPADES**

Standard Spade Set

An extremely versatile and essential digging attachment for mini excavators. Unlike most systems, with the Wedglock SS Spade System the carrier doubles as the narrow digging tool itself. Simply change the width by fitting the SX Spade Attachment with two bolts.

Spade Bucket

Specifically designed for trenching soft and clingy materials such as clay and producing a precision finished trench. Available in various widths.
