

WEDGELOCK BCX & BDX

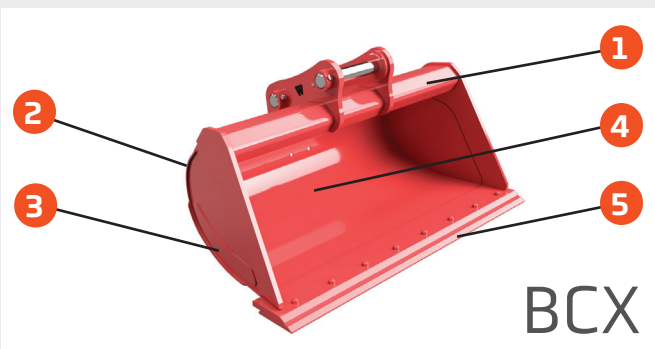

BUCKETS

Wedglock wide buckets are manufactured using wear resistant materials optimizing strength, weight and wear properties for durability and robustness. Bolt-on cutting edges fitted as standard to larger weight classes. Optional on mini buckets.

Wedglock Digging & Trenching Buckets are manufactured using a range of high quality

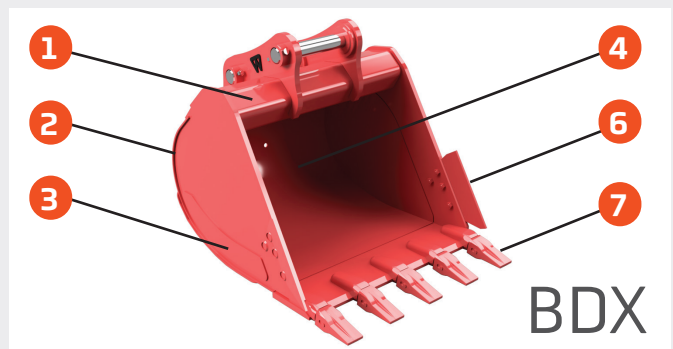

steels, including wear resistant materials optimising strength, weight and wear properties for durability and robustness.

Fitted with bolt-on side cutters as standard. Optional slipper plates are manufactured to suit and are available on request.

BCX

- 1 Folded top box torsion beam
- 3 Abrasion wear plate with full extra wrap on larger models
- 5 Bolt-on reversible edge (as stated)
- 7 Supplied with standard GET

BDX

- 2 Side plate welds inside the wrap, protecting side seams
- 4 BX bucket shell – dual curve & side taper
- 6 Bolt-on side cutters

Specifications subject to change. Images are representative only
