

**PRACTICAL
VERSATILITY**

BTX Tilt Bucket

- Folded top box construction from high grade material as used in all BCX & BDY buckets manufactured by Wedglock
- Top saddle construction, increasing strength of cross beam structure.
- Angled Single Acting Tilt Cylinders with Induction Hardened Rods and spherical bearing mounts
- Dual curve radius in the shell, improving loading and dumping
- FULL abrasion wear resistant wrap across the whole width of the bucket as will all BCX & BDY buckets 130 class and above.
- FULL skin on 022 to 070 range manufactured from abrasion resistant plate
- Side Plates located inside the wrap reducing potential wear of welded joints
- Holes for replaceable bolt on edges –easier to maintain
- Increased capacity –matching latest machine performance and abilities.
- Available from 1.5t through to 50t in standard widths.

The new BTX range covers excavators from 1.5t – 50T
