- Easily covers existing walls

**Typical Applications**

- Bathrooms/Shower Walls
- Kitchens/Laundry
- Feature Walls
- Vanity/Mirror Surrounds

**Colours available:**

Signature Series Colours:

**Valchromat® is an innovative product that combines the natural features of wood to the brightness of colours.**

The added value of Valchromat® comes not only from colour but also from its distinctive composition and manufacturing process. It is a wood fibre panel coloured throughout, where fibres are coloured individually, infused with organic dyes and bonded together by a special resin which gives Valchromat® unique physical and mechanical features.

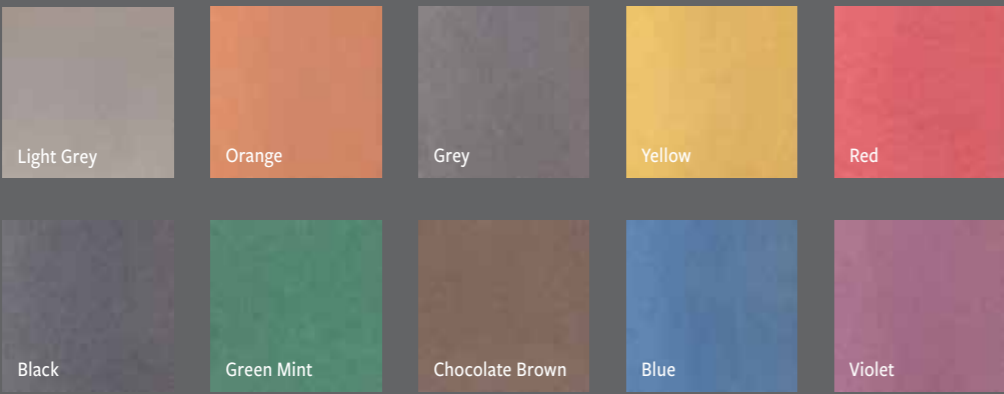

**Main Benefits:**

- Moisture resistant
- Coloured throughout panel
- Greater resistance to bending
- Easy to fabricate/machine
- Durable

**Sheet sizes available:**

- 2440mm x 1220mm
- 8mm, 12mm, 16mm, 19mm & 30mm thickness

**Colours available:**

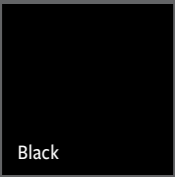

**Suitable for indoor applications.**

High Pressure Laminate (HPL) Plywood panels are durable, cost effective and easy to use. These panels are ideal for kitchen and bathroom joinery applications.

**Sheet sizes available:**

- 2440mm x 1220mm
- 16mm & 18mm thickness

**Colours available:**

**HPL Plywood**

**Multiboard Integral Foam PVC is a lightweight, extruded, rigid foam PVC with a hard surface finish on both sides.**

Available in a range of thicknesses Multiboard is also waterproof with good UV stability which makes the product idea in the construction and joinery markets.

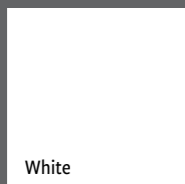

**Main Benefits:**

- Fine cell structure
- Hard surface finish
- Lightweight
- Waterproof
- Non corrosive
- Good thermal insulation
- Good UV stability
- Chemical resistant
- Low flammability
- Excellent printability
- Easy to fabricate, similar to wood

**Sheet sizes available:**

- 2440mm x 1220mm
- 10mm, 16mm, 18mm, 20mm, 25mm & 30mm thickness

**Colours available:**

White

# Multiboard

**Toe Kicks are made from Integral Foam PVC and is a lightweight, extruded, rigid foam PVC with a high pressure laminate on both faces of the board.**

It is available in 16mm thick and three colours. Also being waterproof, it is ideal for kitchen joinery for a quick and simple solution for toe spaces.

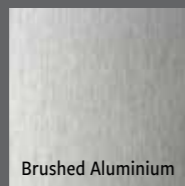

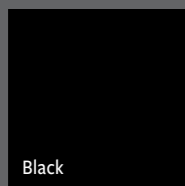

**Main Benefits:**

- Hard surface finish
- Light weight
- Waterproof
- Non-corrosive
- Chemical resistant

**Sheet sizes available (16mm thickness):**

- 3600mm x 150mm
- 3600mm x 1200mm

**Colours available:**

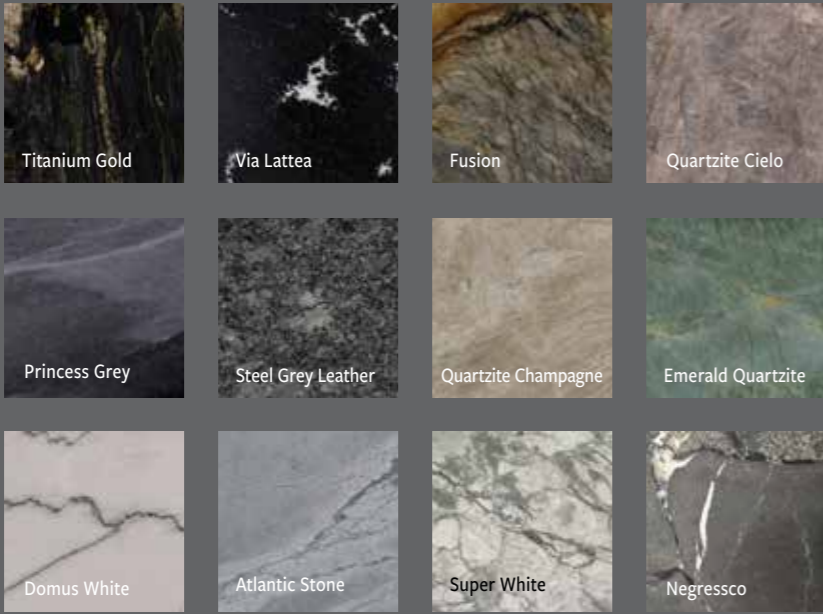

# Toe Kicks

**A million years of creativity. It's all yours...One of the hardest stones. Granite is an igneous rock formed over millions of years.** Granite is a combination of at least 20 percent quartz and feldspar, with small amounts of mica and other minerals.

The most universally popular natural stone, Granite is ideal for: bench tops, vanities, fire surrounds, bar tops, tables, interior/exterior and many other applications. With no two slabs identically the same, your design will be unique to your home. There are different types of surfaces to choose from. Honed provides a matt low sheen finish. Polished provides a smooth gloss finish, emphasising the brilliant colours and grains of natural stone. Leathered enhances its natural movement and provides a desirable textured surface.

**A selection of colours available:**

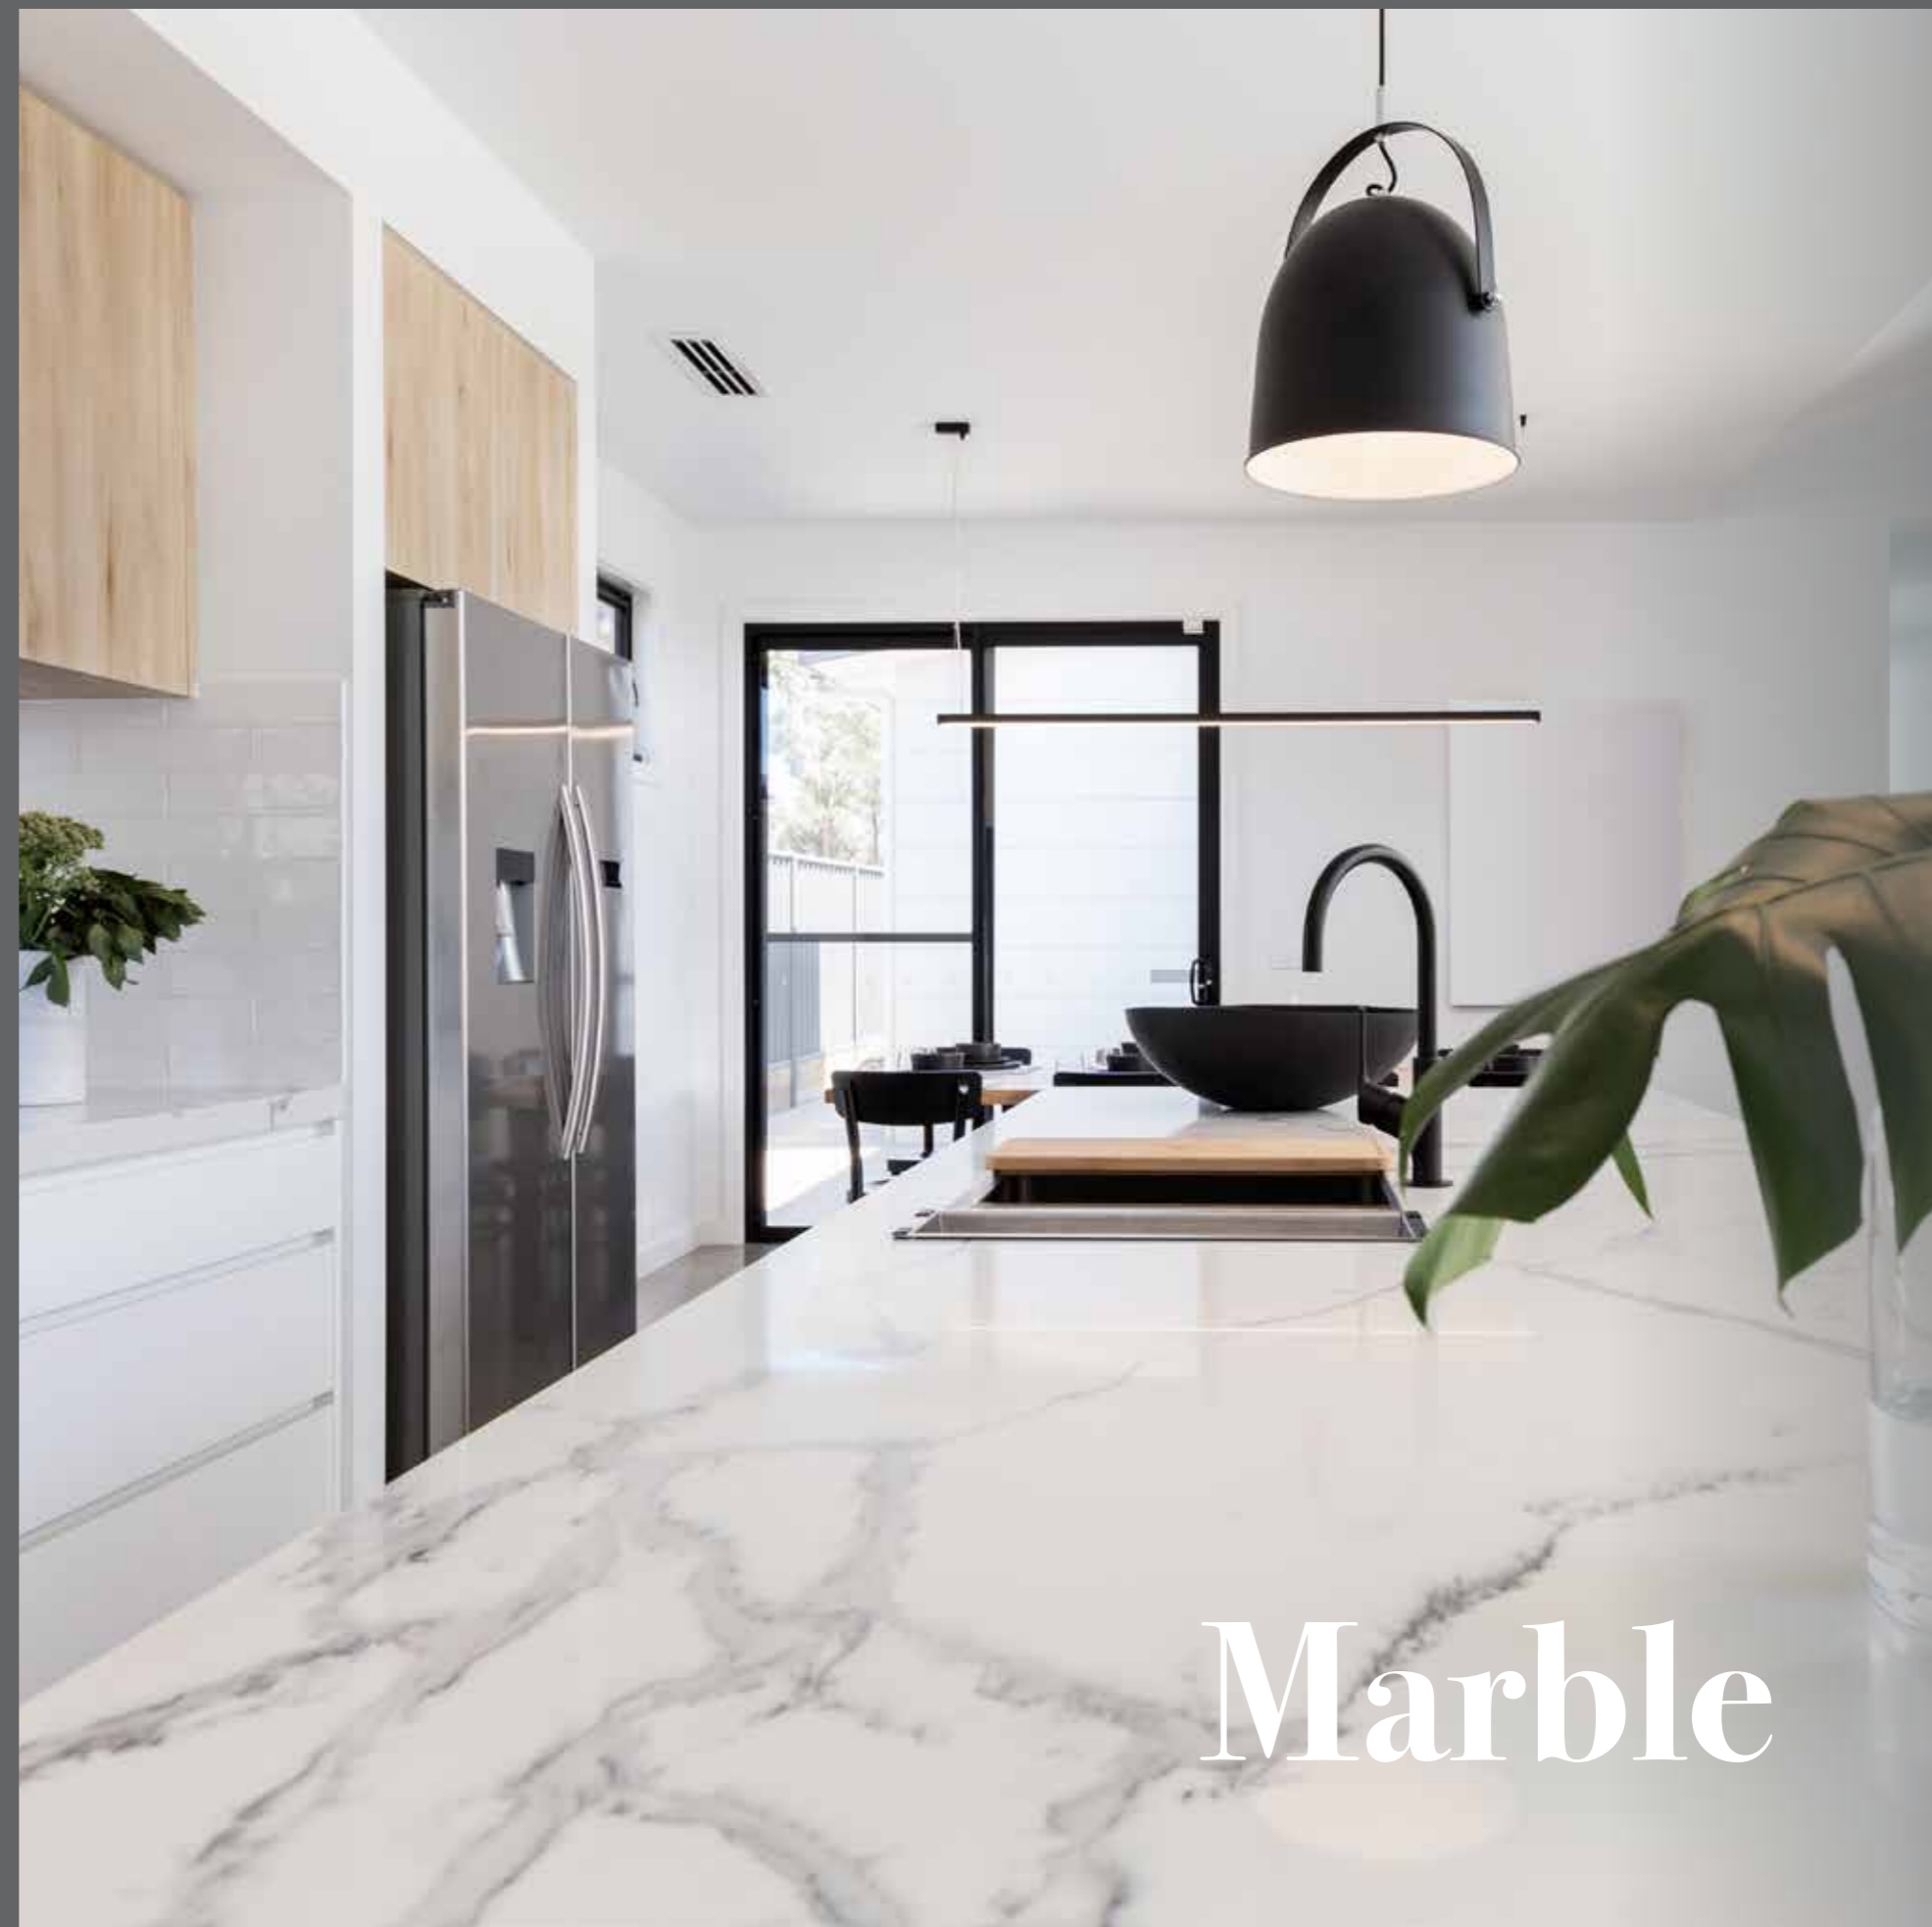

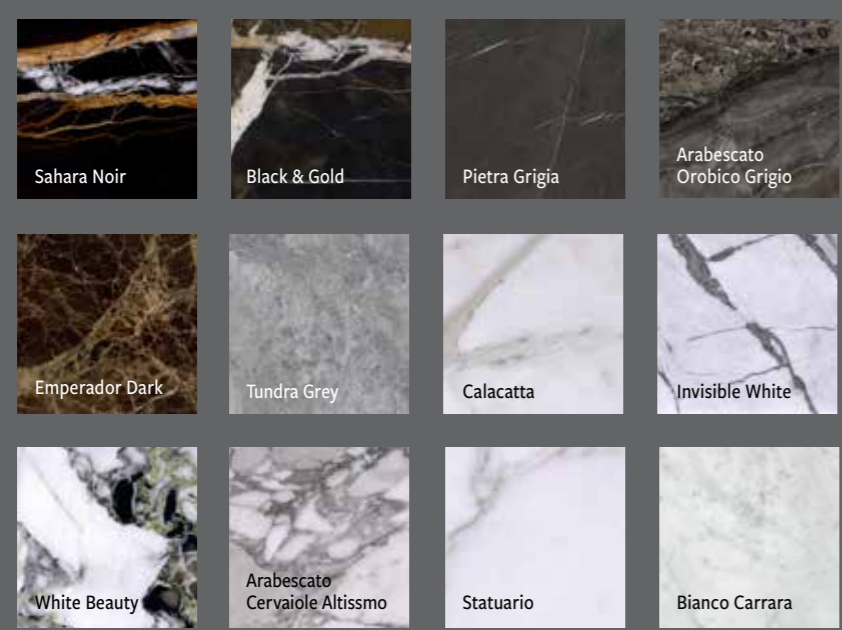

Granite

**An elite product of Nature. Marble, formed from limestone with heat and pressure causing metamorphism over years in the earth's crust.**

This pressure forces the limestone to change in texture and composition. The process is called recrystallisation. Fossilised materials in the limestone, along with its original carbonate minerals, recrystallise and form large, coarse grains of calcite. It usually contains other minerals such as: clay minerals, micas, quartz, pyrite, iron oxides and graphite. Polishing marble rock will bring out the handsome grain properties of the rock. The various swirls and veins that are often found within marble can be attributed to various mineral impurities. The end result of these different impurities can lead to unique and interesting colour combinations, like many other metamorphic rocks. With no two slabs identically the same, your design will be unique to your home.

**A selection of colours available:**

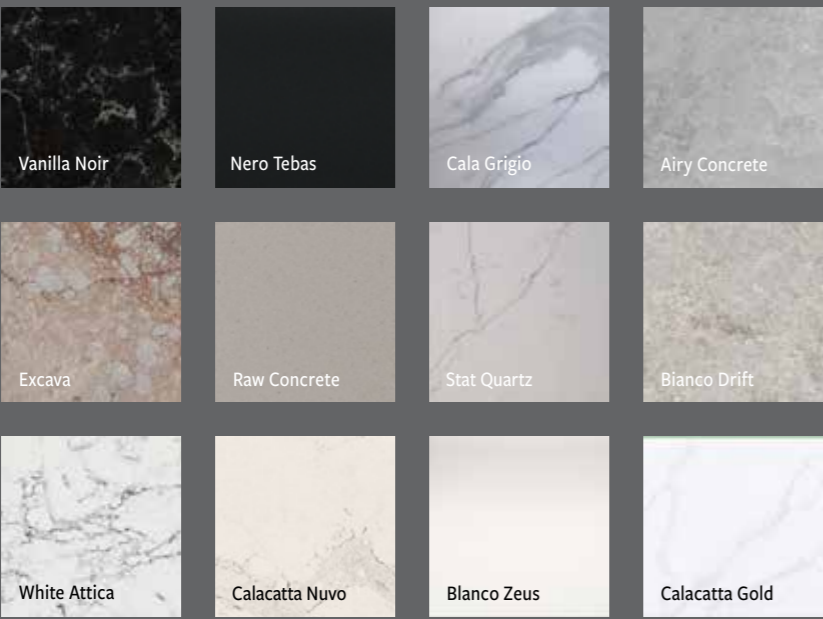

Marble

**Engineered Stone is the ideal surface, as it is extremely hard wearing, making it a practical and aesthetic choice for any commercial or residential application.**

Engineered Stone is a non-porous, easy-care man made stone that is resistant to heat, chips, stains and scratches. It also has a low absorption rate and requires little maintenance; and can be worked and shaped just like marble and granite.

**A selection of colours available:**

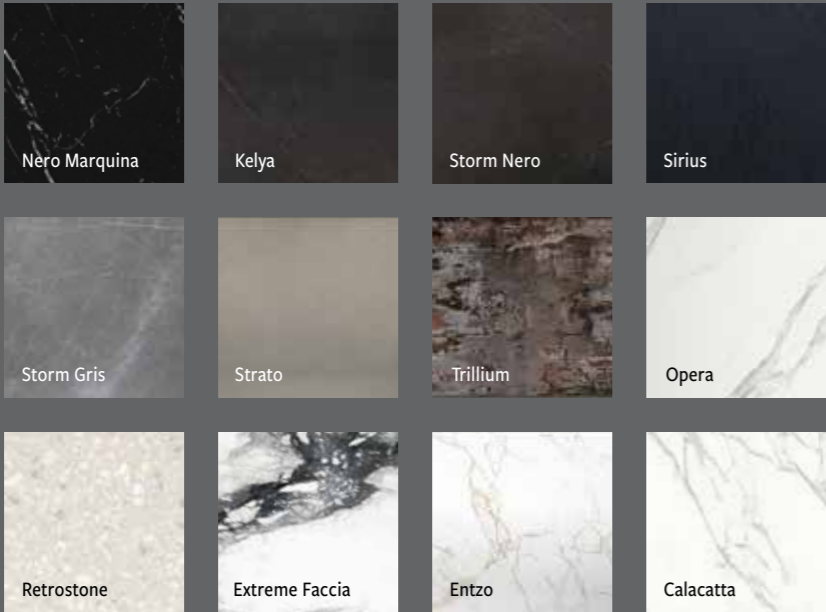

# Engineered Stone

**The perfect example of modern style that can be used inside and out.** Ultra Compact and Sintered Stones are extremely hard materials that use natural raw minerals compacted together and sintered at extreme temperatures.

The colour, texture and appearance will remain unchanged even withstanding New Zealand's harsh ultra-violet rays, making it ideal for interior and exterior projects. It is also durable, abrasion and moisture resistant. Available in a range of gloss, matt and textured finishes, we believe there is a style that will compliment any environment. Ultra Compact and Sintered Stones are ideal for benchtops, vanities, splashbacks, tables and outdoor areas.

**A selection of colours available:**

Porcelain

**ReStyl is a highly versatile, cost-effective and self-adhesive film that can cover almost any surface in no time. It is used in refreshing and upcycling spaces such as office interiors, hotel rooms, retail, restaurants and cafes, merchandising and more – without the cost of removing or demolishing and replacing architectural elements.**

ReStyl comes in 1220mm wide rolls and available within a 2 week leadtime, which includes the full comprehensive range and with low minimum order quantities. Additionally, this product is at a competitive price point, therefore providing exceptional value and accessibility to a great product with virtually limitless use and quick turnaround.

Offering high quality with up ten years of warranty, ReStyl is extremely versatile across many interior spaces, offering a low maintenance covering that is both quick and easy to apply. It also offers other benefits such as resistance to UV rays, NZ standard flame retardancy, and stain resistance to products such as coffee and soy sauce. The product is also anti-microbial, which makes it a perfect product to use in hotels, offices and retail.

#### **Features & Benefits**

- Easily installed with air flow & bubble free technology
- Cost effective
- Over 500 styles
- 10 year warranty
