Introduction

The October 2016 release will be made available on the evening of Wednesday 26th October. It will contain the new features and improvements detailed below.

Integrator Version 2.5

The latest version of Horizon Integrator now includes the following 6 additional CRM integrations

Autotask

Dezrez

PCHomes

Rezi

RPM

WinSIMS

Horizon Integrator can now be updated to version 2.5.34 Details of how to do this can be found in the user guide on the knowledge base along with the individual CRM user guides

****IMPORTANT****

Integrator 2.5 is not currently compatible with any mass deployment tools when carrying out an upgrade from an earlier version. Using these will result in all existing user settings being deleted.

Any upgrades from earlier versions will need to be carried out by the user/administrator on their individual machine.

We are aware of the following mass deployment tools affected, please see below. Please be aware other similar tools could experience the same behaviour and as advised we highly recommend updating individual clients.

- ◆ SCCM
- ◆ Group Policy deployment
- ◆ OPSI
- ◆ Rudder
- ◆ Symantec Client Management Suite
- ◆ Dell KACE
- ◆ ZenWorks
- ◆ IT Asset Too
