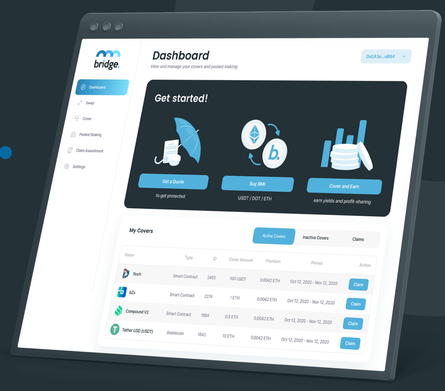
bridge.

Bridge is a decentralized, discretionary insurance platform protecting smart contracts, stable coins, centralized exchanges, and more.



Problem

Smart contracts, stable coins and other crypto products are susceptible to hackers & failures, making it difficult for institutions to enter the market.

Solution

Bridge provides the most transparent and efficient p2p coverage platform, allowing anyone to reliably insure smart contracts, stable coins, and more.

Bridge Covers...

Smart Contracts

Secure against faulty code, bugs, hacks, and protect against permanent loss.

Centralized Exchanges

Coverage to protect against exchange hacks and attacks.

Stable Coins

Insure against Stable Coin failure for USDT, DAI, TUSD and others.

Future Products

New products including support for transaction fees, staking, and farming.

The Bridge Advantage

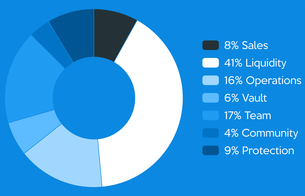
- No KYC Required
- Cost Efficient Average
- Automated Claims
- Fast Settlement
- Small 10% Founder Pool

Token Utility

- DAO Voting Eligibility
- Access to coverage
- Yields from investments
- Premium profit-sharing
- Vote on claims and earn

Token Metrics

Token Ticker: ..... **$BMI**
Token Supply: **160,000,000**
Initial M/Cap: **$500,000**
Sale Price: **$0.125**
Vesting: ..... **25% per Month**



Roadmap*

*Subject to change

- **Q4 2020**
- **Q1 2021**
  - Private Sale Development
  - Mainnet V1
  - DEX Listing
  - CEX Listing
- **Q2 2021**
  - $100M Coverage Forecast
  - Bridge DAO Governance
- **Q3 2021**
  - Product Expansion
  - Capital Pool Growth
  - Coverage Growth
- **Q4 2021**
  - Main net V2
  - Traditional Insurance
