

Medical Grade Silicone T-Tubes

Bentec Medical's Silicone elastomeric T-Tubes are smooth, soft and pliable catheters inserted through the skin for wound drainage. The most common site of placement is percutaneously into the common bile duct after either laparoscopic or open choledochotomy (exploration of the bile duct for gall stones).

Each of our Silicone T-Tubes has a 30cm cross-arm and a 30cm leg section; these 2 parts of the T-Tube have equal external diameters and consistent internal diameters. All sizes are available in translucent materials and ship sterile.

Silicone T-Tubes				STERILE
Product Code	Size (F)	Cross-arm Length (cm)	Leg Length (cm)	Quantity
SU130-1208	4	30	30	1 per pkg
SU130-1216	6	30	30	1 per pkg
SU130-1224	8	30	30	1 per pkg
SU130-1228	10	30	30	1 per pkg
SU130-1238	12	30	30	1 per pkg
SU130-1239	14	30	30	1 per pkg
SU130-1240	16	30	30	1 per pkg
