

## Working student – Software Engineer

*Berlin, Germany*

heyday is building the one-stop shop for employee perks & benefits. We make it easy and convenient for businesses to reward their employees and enable meaningful social interactions with and amongst them – while taking care of the administrative hassles. We are a young startup that is now looking to expand its team.

### The role:

- We are looking for a working student that wants to grow into a software engineer role at our company and is eager to work with and learn from an experienced tech team
- You will be a pioneer in delivering perks & benefits to our customer's employees with a fantastic user experience
- You will closely work in a hands-on startup environment where you can learn quickly and can take over responsibility quickly

### What you get:

- The chance to build a new software product from the beginning and shape our technology and engineering culture
- A competitive salary, a great perks & benefits package, and the flexibility to work-from-home or in our cozy office directly at Paul-Linke-Ufer
- The opportunity to work in and learn an absolute state-of-the-art tech stack:
  - Backend: TypeScript, NodeJS, NestJS, TypeORM, Apollo Server
  - Frontend: TypeScript, ReactJS, NextJS, Apollo Client, MaterialUI
  - API: mainly GraphQL
  - Database: PostgreSQL
  - Infrastructure: AWS, Terraform, Kubernetes, Docker

### What we look for:

- You are a student in computer science, software engineering or similar, ideally in your last year of studies
- You have experience with JavaScript-related frameworks such as Node.js and React.js from your studies
- You already have initial knowledge about SQL database design from your studies
- You have a growth and learning mindset and are eager to utilize your skills in building an outstanding software product
- You want to move and build things fast and operate under the "ask for forgiveness instead of permission" principle
- You can work and communicate in English
