

A Note from the Founder

I have always been captivated by the capabilities of young hearts and minds- like a magician's hat there is always room for more, as long as we are willing to believe. As adults with schedules and deadlines and big responsibilities we often forget that children have no constraints and view the world with wonder - they are full of limitless imagination and possess the capacity to grow with every new experience. Like a sponge, the more we share and teach the more they soak in, and at For ALL KIDZ we aim to tap into this limitless growth.

For over 30 years I have centered my life's purpose around inspiring children to reach their full potential. Remembering back to 1984 when the very first school took a chance on our fledgling program, it was our mutual belief in children that allowed the message to have an instant and lasting impact. Since those early days over three decades ago, we have delivered 100,000 performances partnering with schools who similarly believe that there should always be room for compelling character programs for their students.

Our winning formula is simple and effective; we partner with educators to inspire their pupils with our fun and engaging live performances, creating an unforgettable experience for the entire school community. Enthusiastic feedback from teachers and staff reminds us of the true impact our programs have- that our carefully designed presentations and high-quality classroom resources are indeed bringing positive change for their students.

I feel overjoyed to be leading an organization that so strongly believes in the promise of today's youth, encouraging ALL children to achieve their fullest potential. What excitement our team feels as we plant seeds of hope, and creatively share principals for lifelong success!

I would be honored to have you join our team investing in kids. I cannot think of a better return than shaping the future of young lives!
