Independent Auditor's Report

To the Board of Directors
The Dearborn Academy

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the major fund, and the remaining fund information of The Dearborn Academy (the "Academy") as of and for the year ended June 30, 2021 and the related notes to the financial statements, which collectively comprise The Dearborn Academy's basic financial statements, as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the major fund, and the remaining fund information of The Dearborn Academy as of June 30, 2021 and the respective changes in its financial position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

To the Board of Directors
The Dearborn Academy

Required Supplemental Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and other required supplemental information, as identified in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, which considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplemental information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated October 28, 2021 on our consideration of The Dearborn Academy's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering The Dearborn Academy's internal control over financial reporting and compliance.

October 28, 2021

This section of The Dearborn Academy's (the "Academy") annual financial report presents our discussion and analysis of the Academy's financial performance during the year ended June 30, 2021. Please read it in conjunction with the Academy's financial statements, which immediately follow this section.

Using This Annual Report

This annual report consists of a series of financial statements and notes to those financial statements. These statements are organized so the reader can understand The Dearborn Academy financially as a whole. The government-wide financial statements provide information about the activities of the whole Academy, presenting both an aggregate view of the Academy's finances and a longer-term view of those finances. The fund financial statements provide the next level of detail. For governmental activities, these statements tell how services were financed in the short term and what remains for future spending. The fund financial statements look at the Academy's operations in more detail than the government-wide financial statements by providing information about the Academy's most significant fund, the General Fund, with the nonmajor Food Service Fund presented in one column as a nonmajor fund. This report is composed of the following elements:

Management's Discussion and Analysis (MD&A) (Required Supplemental Information)

Basic Financial Statements

Government-wide Financial Statements

Fund Financial Statements

Notes to Financial Statements

Required Supplemental Information

Budgetary Information for the General Fund

Schedules of Proportionate Share of the Net Pension and Net OPEB Liabilities

Schedules of Pension and OPEB Contributions

Notes to Required Supplemental Information

Reporting the Academy as a Whole - Government-wide Financial Statements

One of the most important questions asked about the Academy is, "As a whole, what is the Academy's financial condition as a result of the year's activities?" The statement of net position and the statement of activities, which appear first in the Academy's financial statements, report information on the Academy as a whole and its activities in a way that helps you answer this question. We prepare these statements to include all assets, deferred outflows of resources, liabilities, and deferred inflows of resources using the accrual basis of accounting, which is similar to the accounting used by most private sector companies. All of the current year's revenue and expenses are taken into account, regardless of when cash is received or paid.

These two statements report the Academy's net position - the difference between assets plus deferred outflows of resources and liabilities plus deferred inflows of resources, as reported in the statement of net position - as one way to measure the Academy's financial health or financial position. Over time, increases or decreases in the Academy's net position - as reported in the statement of activities - are indicators of whether its financial health is improving or deteriorating. The relationship between revenue and expenses is the Academy's operating results. However, the Academy's goal is to provide services to our students, not to generate profits as commercial entities do. One must consider many other nonfinancial factors, such as the quality of the education provided and the safety of the schools, to assess the overall health of the Academy.

The statement of net position and the statement of activities report the governmental activities for the Academy, which encompass all of the Academy's services, including instruction, support services, community services, athletics, and food services. Unrestricted state aid (foundation allowance revenue) and state and federal grants finance most of these activities.

The Dearborn Academy

Management's Discussion and Analysis (Continued)

Reporting the Academy's Fund Financial Statements

The Academy's fund financial statements provide detailed information about the most significant funds, not the Academy as a whole. Some funds are required to be established by state law. The Academy maintains another fund to help it control and manage money for particular purposes (the Food Service Fund).

Governmental Funds

All of the Academy's services are reported in governmental funds. Governmental fund reporting focuses on showing how money flows into and out of funds and the balances left at year end that are available for spending. They are reported using an accounting method called modified accrual accounting, which measures cash and all other financial assets that can readily be converted to cash. The governmental fund statements provide a detailed short-term view of the operations of the Academy and the services it provides. Governmental fund information helps determine whether there are more or fewer financial resources that can be spent in the near future to finance the Academy's programs. We describe the relationship (or differences) between governmental activities (reported in the statement of net position and the statement of activities) and governmental funds in a reconciliation.

The Academy as a Whole

Recall that the statement of net position provides the perspective of the Academy as a whole. The following table provides a summary of the Academy's net position as of June 30, 2021 and 2020:

	Governmental Activities	
	2021	2020
	(in thousands)	
Assets		
Current and other assets	\$ 2,480.4	\$ 2,082.1
Capital assets	181.3	206.3
Total assets	2,661.7	2,288.4
Deferred Outflows of Resources	93.1	93.7
Liabilities		
Current liabilities	1,129.1	841.4
Net pension liability	280.1	258.1
Net OPEB liability	44.1	55.7
Total liabilities	1,453.3	1,155.2
Deferred Inflows of Resources	44.1	39.4
Net Position		
Net investment in capital assets	181.3	206.3
Unrestricted	1,076.1	981.2
Total net position	<u>\$ 1,257.4</u>	<u>\$ 1,187.5</u>

The above analysis focuses on net position. The change in net position of the Academy's governmental activities is discussed below. The Academy's net position was \$1,257.4 thousand at June 30, 2021. Net investment in capital assets totaling \$181.3 thousand is the original cost, less depreciation of the Academy's capital assets. The remaining amount of net position (\$1,076.1 thousand) was unrestricted.

The \$1,076.1 thousand in unrestricted net position of governmental activities represents the accumulated results of all past years' operations. The unrestricted net position balance enables the Academy to meet working capital and cash flow requirements, as well as to provide for future uncertainties. The operating results of the General Fund will have a significant impact on the change in unrestricted net position from year to year.

The Dearborn Academy

Management's Discussion and Analysis (Continued)

The results of this year's operations for the Academy as a whole are reported in the condensed statement of activities below, which shows the changes in net position for the years ended June 30, 2021 and 2020:

	Governmental Activities	
	2021	2020
	(in thousands)	
Revenue		
Program revenue:		
Charges for services	\$ 2.1	\$ 7.8
Operating grants	2,524.8	2,050.9
General revenue:		
State aid not restricted to specific purposes	4,314.7	4,262.0
Other	15.8	48.2
Total revenue	6,857.4	6,368.9
Expenses		
Instruction	3,420.6	2,981.4
Support services	3,008.1	2,870.3
Athletics	20.9	24.3
Food services	310.4	462.0
Community services	2.5	21.3
Depreciation expense (unallocated)	25.0	25.0
Total expenses	6,787.5	6,384.3
Change in Net Position	69.9	(15.4)
Net Position - Beginning of year	1,187.5	1,202.9
Net Position - End of year	\$ 1,257.4	\$ 1,187.5

As reported in the statement of activities, the cost of all of our governmental activities this year was \$6,787.5 thousand. Certain activities were partially funded by other governments and organizations that subsidized certain programs with grants and contributions (\$2,524.8 thousand). We paid for the remaining public benefit portion of our governmental activities with \$4,314.7 thousand in state foundation allowance and other revenue (i.e., interest and general entitlements).

The Academy experienced an increase in net position of \$69.9 thousand compared to a decrease in net position of \$15.4 thousand last year. Key reasons for the change in net position were the increase in operating grants and state aid not restricted to specific purposes compared to last year.

As discussed above, the net cost shows the financial burden that was placed on the State by each of these functions. Since unrestricted state aid constitutes the vast majority of the Academy's operating revenue sources, the board of directors and administration must annually evaluate the needs of the Academy and balance those needs with state-prescribed available unrestricted resources.

The Academy's Funds

As we noted earlier, the Academy uses funds to help it control and manage money for particular purposes. Looking at funds helps the reader consider whether the Academy is being accountable for the resources the State and others provide to it and may provide more insight into the Academy's overall financial health.

As the Academy completed this year, the governmental funds reported a combined fund balance of \$1,346.4 thousand. The Academy experienced an increase in combined fund balance of \$105.8 thousand compared to an increase in combined fund balance of \$27.7 thousand last year. The primary reasons for the change in fund balance were the increase in operating grants and state aid not restricted to specific purposes compared to last year.

General Fund fund balance is available to fund costs related to allowable school operating purposes.

General Fund Budgetary Highlights

Over the course of the year, the Academy revises its budget as it attempts to deal with unexpected changes in revenue and expenditures. State law requires that the budget be amended to ensure that expenditures do not exceed appropriations. The final amendment to the budget was adopted in June 2021. A schedule showing the Academy's original and final budget amounts compared with amounts actually paid and received is provided in the required supplemental information of these financial statements.

There were significant revisions made to the 2020-2021 General Fund original budget. State funding was increased due to enrollment. The increase in state funding was offset by a reduction related to COVID-19. Federal funding, basic programs instruction, and instructional staff support services were increased for the 21st CCLC grant awarded during the year.

There were no significant variances between the final budget and actual amounts.

Capital Assets and Debt Administration

Capital Assets

As of June 30, 2021, the Academy had \$181,262 invested in capital assets, which include a modular building, furniture, and equipment.

There were no additions to capital assets during the year, and there are no major capital projects planned for the 2021-2022 fiscal year. We present more detailed information about our capital assets in the notes to the financial statements.

Debt

The Academy has no outstanding long-term debt at June 30, 2021.

Economic Factors and Next Year's Budgets and Rates

Our appointed officials and administration consider many factors when setting the Academy's 2020-2021 fiscal year budget. One of the most important factors affecting the budget is our student count. The state foundation revenue is determined by multiplying the blended student count by the foundation allowance per pupil. The 2021-2022 budget was adopted in June 2021 based on an estimate of students who will enroll in September 2021. Approximately 66 percent of total General Fund revenue is from the foundation allowance. Under state law, the Academy cannot access additional property tax revenue for general operations. As a result, academy funding is heavily dependent on the State's ability to fund local school operations. Based on early enrollment data at the start of the 2020 school year, we anticipate that the fall student count will be close to the estimates used in creating the 2020-2021 budget. Once the final student count and related per pupil funding are validated, state law requires the Academy to amend the budget if actual academy resources are not sufficient to fund original appropriations.

Since the Academy's revenue is heavily dependent on state funding and the health of the State's School Aid Fund, the actual revenue received depends on the State's ability to collect revenue to fund its appropriation to the Academy. The State periodically holds a Revenue Estimating Conference to estimate revenue. Based on the results of the most recent conference, the State estimates funds are sufficient to fund the appropriation, including a foundation allowance increase of \$65 per pupil.

The Dearborn Academy

Governmental Funds Reconciliation of the Statement of Revenue, Expenditures, and Changes in Fund Balances to the Statement of Activities

Year Ended June 30, 2021

Net Change in Fund Balances Reported in Governmental Funds	\$ 105,809
Amounts reported for governmental activities in the statement of activities are different because:	
Governmental funds report capital outlays as expenditures; however, in the statement of activities, these costs are allocated over their estimated useful lives as depreciation expense	(25,022)
Revenue in the statement of activities that does not provide current financial resources is not reported as revenue in the funds until it is available	4,817
Revenue in support of pension contributions made subsequent to the measurement date	(2,078)
Some employee costs (pension and OPEB) do not require the use of current financial resources and, therefore, are not reported as expenditures in the governmental funds	<u>(13,589)</u>
Change in Net Position of Governmental Activities	<u><u>\$ 69,937</u></u>

June 30, 2021

Note 1 - Nature of Business

The Dearborn Academy (the "Academy") is an academy in the state of Michigan that provides educational services to students.

Note 2 - Significant Accounting Policies

Accounting and Reporting Principles

The Academy follows accounting principles generally accepted in the United States of America (GAAP), as applicable to governmental units. Accounting and financial reporting pronouncements are promulgated by the Governmental Accounting Standards Board (GASB). The following is a summary of the significant accounting policies used by the Academy:

Reporting Entity

The Academy was formed as a charter school academy pursuant to the Michigan School Code of 1976, as amended by Act No. 362 of the Public Acts of 1993 and Act No. 416 of the Public Acts of 1994. The Academy provides education for students in grades K through 8.

In July 2007, the Academy entered into a five-year contract with Central Michigan University to charter a public school academy, which was extended and expired on June 30, 2018. On July 1, 2018, this contract was extended through June 30, 2023. The contract requires the Academy to act exclusively as a governmental agency and not undertake any action inconsistent with its status as an entity authorized to receive state school aid funds pursuant to the state constitution.

The Central Michigan University board of trustees is the fiscal agent for the Academy and is responsible for overseeing the Academy's compliance with the contract and all applicable laws. The Academy pays the Central Michigan University board of trustees 3.0 percent of state aid foundation allowance as administrative fees. The total administrative fees for the year ended June 30, 2021 were approximately \$122,000.

The accompanying basic financial statements have been prepared in accordance with criteria established by the Governmental Accounting Standards Board for determining the various governmental organizations to be included in the reporting entity. These criteria include significant operational or financial relationships with the Academy. Based on the application of the criteria, the entity does not contain component units.

Report Presentation

Governmental accounting principles require that financial reports include two different perspectives - the government-wide perspective and the fund-based perspective. The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the nonfiduciary activities of the primary government and its component units, as applicable. The government-wide financial statements are presented on the economic resources measurement focus and the full accrual basis of accounting. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met. The statements also present a schedule reconciling these amounts to the modified accrual-based presentation found in the fund-based statements. All of the Academy's government-wide activities are considered governmental activities.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenue. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenue includes: (1) charges to customers or applicants for goods, services, or privileges provided and (2) operating grants and contributions that are restricted to meeting the operational or capital requirements of a particular function. Unrestricted intergovernmental receipts and other items not properly included among program revenue are reported instead as general revenue.

June 30, 2021

Note 2 - Significant Accounting Policies (Continued)

As a general rule, the effect of interfund activity has been removed from the government-wide financial statements. Separate financial statements are provided for governmental funds. Major individual governmental funds are reported as separate columns in the fund financial statements.

Basis of Accounting

The governmental funds use the current financial resources measurement focus and the modified accrual basis of accounting. This basis of accounting is intended to better demonstrate accountability for how the government has spent its resources.

Expenditures are reported when the goods are received or the services are rendered. Capital outlays are reported as expenditures (rather than as capital assets) because they reduce the ability to spend resources in the future; conversely, employee benefit costs that will be funded in the future (such as pension and retiree health care-related costs) are not counted until they come due for payment. In addition, debt service expenditures, claims, and judgments are recorded only when payment is due.

Revenue is not recognized until it is collected or collected soon enough after the end of the year that it is available to pay for obligations outstanding at the end of the year. For this purpose, the Academy considers amounts collected within 60 days of year end to be available for recognition. Revenue not meeting this definition is classified as a deferred inflow of resources.

Fund Accounting

The Academy accounts for its various activities in several different funds in order to demonstrate accountability for how it spends certain resources; separate funds allow the Academy to show the particular expenditures for which specific revenue is used. The Academy has only governmental funds.

Governmental Funds

Governmental funds include all activities that provide general governmental services that are not business-type activities. Governmental funds can include the General Fund, special revenue funds, debt service funds, capital project funds, and permanent funds. The Academy's only major fund is the General Fund, which is the primary operating fund because it accounts for all financial resources used to provide government services other than those specifically assigned to another fund.

Additionally, the Academy reports the following nonmajor governmental fund type:

- Special revenue funds are used to account for the proceeds of specific revenue sources that are restricted or committed to expenditure for specified purposes. The Academy's special revenue fund is the Food Service Fund. Revenue sources for the Food Service Fund are derived primarily from grants received from state and federal sources. Any operating deficit generated by these activities is the responsibility of the General Fund.

Specific Balances and Transactions

Cash and Investments

Cash and cash equivalents include cash on hand, demand deposits, and short-term investments with a maturity of three months or less when acquired. Investments are stated at fair value, except for investments in external investment pools, which are valued at amortized cost or at net asset value.

Receivables

Accounts receivable are shown net of an allowance for uncollectible amounts. The Academy considers all accounts receivable to be fully collectible; accordingly, no allowance for uncollectible amounts is recorded.

Note 2 - Significant Accounting Policies (Continued)

Prepaid Costs

Certain payments to vendors and security deposits reflect costs applicable to future fiscal years and deposits that the Academy is eligible to receive when leases expire. These are recorded as prepaid costs in both the government-wide and fund financial statements.

Capital Assets

Capital assets are reported in the applicable governmental column in the government-wide financial statements. Capital assets are defined by the Academy as assets with an initial individual cost of more than \$5,000 and an estimated useful life in excess of one year. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated acquisition value at the date of donation. Costs of normal repair and maintenance that do not add to the value or materially extend asset life are not capitalized. The Academy does not have infrastructure-type assets.

Capital assets are depreciated using the straight-line method over the following useful lives:

	Depreciable Life - Years
Building and building additions	10-29
Furniture and equipment	7-20

Deferred Outflows/Inflows of Resources

In addition to assets, the statement of net position and/or balance sheet will sometimes report a separate section for deferred outflows of resources. This separate financial statement element represents a consumption of net position that applies to future periods and will not be recognized as an outflow of resources (expense/expenditure) until then.

The Academy reports deferred outflows related to deferred pension and OPEB plan costs.

In addition to liabilities, the statement of net position and/or balance sheet will sometimes report a separate section for deferred inflows of resources. This separate financial statement element represents an acquisition of net position that applies to future periods and will not be recognized as an inflow of resources (revenue) until that time.

The Academy reports deferred inflows related to related to revenue in support of pension contributions made subsequent to the measurement date, deferred pension and OPEB plan cost reductions, and unavailable revenue.

Net Position

Net position of the Academy is classified in three components. Net investment in capital assets consists of capital assets net of accumulated depreciation. The restricted component of net position consists of restricted assets reduced by liabilities and deferred inflows of resources related to those assets. Unrestricted net position is the remaining net position that does not meet the definition of invested in capital or restricted.

June 30, 2021

Note 2 - Significant Accounting Policies (Continued)

Fund Balance

The Academy will sometimes fund outlays for a particular purpose from both restricted and unrestricted resources (the total of committed, assigned, and unassigned fund balance). In order to calculate the amounts to report as restricted, committed, assigned, and unassigned fund balance in the governmental fund financial statements, a flow assumption must be made about the order in which the resources are considered to be applied. It is the Academy's policy to consider restricted fund balance to have been depleted before using any of the components of unrestricted fund balance. Furthermore, when the components of unrestricted fund balance can be used for the same purpose, committed fund balance is depleted first, followed by assigned fund balance. Unassigned fund balance is applied last.

Fund Balance Policies

Fund balance of governmental funds is reported in various categories based on the nature of any limitations requiring the use of resources for specific purposes. The government itself can establish limitations on the use of resources through either a commitment (committed fund balance) or an assignment (assigned fund balance).

The committed fund balance classification includes amounts that can be used only for the specific purposes determined by a formal action of the government's highest level of decision-making authority. The board of directors is the highest level of decision-making authority for the government that can, by passing of a resolution prior to the end of the fiscal year, commit fund balance. Once adopted, the limitation imposed by the resolution remains in place until a similar action is taken (the adoption of another resolution) to remove or revise the limitation.

Amounts in the assigned fund balance classification are intended to be used by the government for specific purposes but do not meet the criteria to be classified as committed. The Academy has, by resolution, authorized the board of directors to assign fund balance. Unlike commitments, assignments generally exist only temporarily. In other words, an additional action does not normally have to be taken for the removal of an assignment. Conversely, as discussed above, an additional action is essential to either remove or revise a commitment.

Grants and Contributions

The Academy receives federal, state, and local grants, as well as contributions from individuals and private organizations. Revenue from grants and contributions (including contributions of capital assets) is recognized when all eligibility requirements, including time requirements, are met. Grants and contributions may be restricted for either specific operating purposes or for capital purposes. Amounts that are unrestricted or that are restricted to a specific operating purpose are reported as nonoperating revenue. Amounts restricted to capital acquisitions are reported after nonoperating revenue and expenses.

Pension and Other Postemployment Benefit (OPEB) Plans

For the purpose of measuring the net pension and net OPEB liabilities, deferred outflows of resources and deferred inflows of resources related to each plan, and pension and OPEB expense, information about the fiduciary net position of the Michigan Public School Employees' Retirement System (MPERS) and additions to/deductions from the MPERS fiduciary net position have been determined on the same basis as they are reported by MPERS. MPERS uses the economic resources measurement focus and the full accrual basis of accounting. Contribution revenue is recorded as contributions are due, pursuant to legal requirements. Benefit payments (including refunds of employee contributions) are recognized as expenses when due and payable in accordance with the plan benefit terms. Related plan investments are reported at fair value.

Note 2 - Significant Accounting Policies (Continued)

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

Upcoming Accounting Pronouncement

In June 2017, the GASB issued Statement No. 87, *Leases*, which improves accounting and financial reporting for leases by governments. This statement requires recognition of certain lease assets and liabilities for leases that previously were classified as operating leases and recognized as inflows of resources or outflows of resources based on the payment provisions of the contract. It establishes a single model for lease accounting based on the foundational principle that leases are financings of the right to use an underlying asset. Under this statement, a lessee is required to recognize a lease liability and an intangible right-to-use lease asset, and a lessor is required to recognize a lease receivable and a deferred inflow of resources. The Academy is currently evaluating the impact this standard will have on the financial statements when adopted. The provisions of this statement are effective for the Academy's financial statements for the year ending June 30, 2022.

Subsequent Events

The financial statements and related disclosures include evaluation of events up through and including October 28, 2021, which is the date the financial statements were available to be issued.

Note 3 - Stewardship, Compliance, and Accountability

Budgetary Information

Annual budgets are adopted on a basis consistent with generally accepted accounting principles and state law for the General Fund and Food Service Fund. All annual appropriations lapse at fiscal year end.

The budget document presents information by fund and function. The legal level of budgetary control adopted by the governing body (i.e., the level at which expenditures may not legally exceed appropriations) is the function level. Expenditures in excess of amounts budgeted are a violation of Michigan law. State law permits academies to amend their budgets during the year. During the year, the budget was amended in a legally permissible manner. The Academy adjusted budgeted amounts during the year in response to actual and projected activity.

Encumbrance accounting is employed in governmental funds. Amounts encumbered for purchase orders, contracts, etc. are not tracked during the year. Budget appropriations are considered to be spent once the goods are delivered or the services rendered.

Excess of Expenditures Over Appropriations in Budgeted Funds

During the year, the Academy did not have significant expenditure budget variances.

Note 4 - Deposits and Investments

State statutes and the Academy's investment policy authorize the Academy to make deposits in the accounts of federally insured banks, credit unions, and savings and loan associations that have offices in Michigan. The Academy is allowed to invest in U.S. Treasury or agency obligations, U.S. government repurchase agreements, bankers' acceptances, certificates of deposit, commercial paper rated prime at the time of purchase that matures no more than 270 days after the date of purchase, mutual funds, and investment pools that are composed of authorized investment vehicles. The Academy's deposits are in accordance with statutory authority.

Note 4 - Deposits and Investments (Continued)

The Academy has designated four banks for the deposit of its funds.

The investment policy adopted by the board of directors, in accordance with state statutes, has authorized investment in bonds and securities of the United States government, agency obligations of the State, certificates of deposit issued by financial institutions organized and authorized to operate in this state, commercial paper rated prime 1 or prime 2 at the time of purchase and maturing no more than 270 days after the date of purchase, and Michigan Investment Liquid Asset Fund Plus (MILAF) investment pools but not the remainder of state statutory authority, as listed above. The Academy has an investment at June 30, 2021 in an annuity contract, which is not an allowable investment per The Revised School Code (MCL 380.1223).

The Academy's cash and investments are subject to several types of risk, which are examined in more detail below:

Custodial Credit Risk of Bank Deposits

Custodial credit risk is the risk that, in the event of a bank failure, the Academy's deposits may not be returned to it. The Academy's investment policy requires that financial institutions be evaluated and only those with an acceptable risk level for custodial credit risk be used for the Academy's deposits. At year end, the Academy had \$154,902 of bank deposits (checking and savings accounts and certificates of deposit) that was uninsured and uncollateralized. The Academy believes that, due to the dollar amounts of cash deposits and the limits of FDIC insurance, it is impractical to insure all deposits. As a result, the Academy evaluates each financial institution with which it deposits funds and assesses the level of risk of each institution; only those institutions with an acceptable estimated risk level are used as depositories.

Custodial Credit Risk of Investments

Custodial credit risk is the risk that, in the event of the failure of the counterparty, the Academy will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The Academy's investment policy and corresponding rules and regulations state that the custodial credit risk will be minimized by limiting investments to the types of securities allowed by state law and by prequalifying the financial institutions and dealers with which the Academy will do business using the criteria established in the investment policy and corresponding rules and regulations. At June 30, 2021, \$267,052 of investments was uninsured and unregistered.

Investments in Entities that Calculate Net Asset Value per Share

The Academy has an investment in an annuity contract maturing in April 2057, where the fair value of the investment held is measured on a recurring basis using net asset value per share (or its equivalent). At June 30, 2021, the fair value of the investment is \$267,052. The investment has an unfunded commitment of \$0. The annuity contract allows for free withdrawals (i.e., redemptions) in the first three years of up to 10 percent of the annuity contract value but no less than \$1,000. Any subsequent withdrawals over that amount are subject to an 8 percent charge in years one and two and a 7 percent charge in year three. There are no charges on withdrawals in years subsequent to year three. There is no required redemption notice period.

The annuity contract has a guaranteed 1.65 percent interest rate of return for three years, after which point the interest rate will be variable.

Note 5 - Unavailable/Unearned Revenue

Governmental funds report unavailable revenue in connection with receivables for revenue that is not considered to be available to liquidate liabilities of the current period. Governmental funds also report unearned revenue recognition in connection with resources that have been received but not yet earned. At June 30, 2021, the Academy had unavailable revenue of \$4,817 and unearned revenue of \$8,522.

June 30, 2021

Note 6 - Capital Assets

Capital asset activity of the Academy's governmental activities was as follows:

Governmental Activities

	Balance July 1, 2020	Additions	Disposals	Balance June 30, 2021
Capital assets:				
Buildings and building improvements	\$ 505,948	\$ -	\$ -	\$ 505,948
Furniture and equipment	94,424	-	-	94,424
Total capital assets	600,372	-	-	600,372
Accumulated depreciation:				
Buildings and building improvements	310,892	19,411	-	330,303
Furniture and equipment	83,196	5,611	-	88,807
Total accumulated depreciation	394,088	25,022	-	419,110
Net governmental activities capital assets	<u>\$ 206,284</u>	<u>\$ (25,022)</u>	<u>\$ -</u>	<u>\$ 181,262</u>

Depreciation expense was not charged to activities, as the Academy's assets benefit multiple activities, and allocation impractical.

Note 7 - Operating Leases

The Academy has entered into an operating lease agreement for its facility that expires on June 30, 2024. Lease payments of approximately \$40,570 are due monthly, and total payments for the lease were approximately \$487,000 for the current year.

Future minimum annual commitments under these operating leases are as follows:

Years Ending June 30	Amount
2022	\$ 486,852
2023	486,852
2024	486,852
Total	<u>\$ 1,460,556</u>

Note 8 - Risk Management

The Academy is exposed to various risks of loss related to property loss, torts, errors and omissions, and employee injuries (workers' compensation), as well as medical benefits provided to employees. Employee-related claims for management company staff are covered by insurance policies held by the management company. The Academy has purchased commercial insurance for all other claims. There have been no claims brought against the Academy during the year ended June 30, 2021.

June 30, 2021

Note 9 - Management Agreement

In July 1997, the Academy entered into a management agreement with a for-profit corporation. The management company is responsible for substantially all of the management, operation, administration, education, and food services at the Academy. The Academy subcontracts most employees from the management company and reimburses the management company for operating costs. Accounts payable owed to the management company at June 30, 2021 totaled approximately \$1,095,000. The operating costs charged to the Academy by the management company were approximately \$5,753,000 for the year ended June 30, 2021. The agreement was extended in 2019 to continue through June 30, 2023.

Note 10 - Michigan Public School Employees' Retirement System

Plan Description

The Academy participates in the Michigan Public School Employees' Retirement System (the "System"), a statewide, cost-sharing, multiple-employer defined benefit public employee retirement system governed by the State of Michigan that covers substantially all employees of the Academy. Certain academy employees also receive defined contribution retirement and health care benefits through the System. The System provides retirement, survivor, and disability benefits to plan members and their beneficiaries. The System also provides postemployment health care benefits to retirees and beneficiaries who elect to receive those benefits.

The System is administered by the Office of Retirement Services (ORS). The Michigan Public School Employees' Retirement System issues a publicly available financial report that includes financial statements and required supplemental information for the pension and postemployment health care plans. That report is available on the web at <http://www.michigan.gov/orsschools>.

Benefits Provided

Benefit provisions of the defined benefit (DB) pension plan and the postemployment health care plan are established by state statute, which may be amended. Public Act 300 of 1980, as amended, establishes eligibility and benefit provisions for the defined benefit pension plan and the postemployment health care plan.

Depending on the plan option selected, member retirement benefits are calculated as final average compensation times years of services times a pension factor ranging from 1.25 percent to 1.50 percent. The requirements to retire range from attaining the age of 46 to 60 with years of service ranging from 5 to 30 years, depending on when the employee became a member. Early retirement is computed in the same manner as a regular pension but is permanently reduced 0.50 percent for each full and partial month between the pension effective date and the date the member will attain age 60. There is no mandatory retirement age.

Depending on the member's date of hire, MPSERS offers the option of participating in the defined contribution (DC) plan that provides a 50 percent employer match (up to 3 percent of salary) on employee contributions.

Members are eligible for nonduty disability benefits after 10 years of service and for duty-related disability benefits upon hire. Disability retirement benefits are determined in the same manner as retirement benefits but are payable immediately without an actuarial reduction. The disability benefits plus authorized outside earnings are limited to 100 percent of the participant's final average compensation, with an increase of 2 percent each year thereafter.

Benefits may transfer to a beneficiary upon death and are determined in the same manner as retirement benefits but with an actuarial reduction.

June 30, 2021

Note 10 - Michigan Public School Employees' Retirement System (Continued)

Benefit terms provide for annual cost of living adjustments to each employee's retirement allowance subsequent to the employee's retirement date. The annual adjustment, if applicable, is 3 percent. Some members who do not receive an annual increase are eligible to receive a supplemental payment in those years when investment earnings exceed actuarial assumptions.

MPSERS provides medical, prescription drug, dental, and vision coverage for retirees and beneficiaries. A subsidized portion of the premium is paid by MPSERS, with the balance deducted from the monthly pension of each retiree health care recipient. Depending on the member's date of hire, this subsidized portion ranges from 80 percent to the maximum allowed by the statute.

Contributions

Public Act 300 of 1980, as amended, required the Academy to contribute amounts necessary to finance the coverage of pension benefits of active and retired members. Contribution provisions are specified by state statute and may be amended only by action of the state Legislature. Under these provisions, each academy's contribution is expected to finance the costs of benefits earned by employees during the year, with an additional amount to finance a portion of the unfunded accrued liability.

Under the OPEB plan, retirees electing this coverage contribute an amount equivalent to the monthly cost for Part B Medicare and 10 percent, or 20 percent for those not Medicare eligible, of the monthly premium amount for the health, dental, and vision coverage at the time of receiving the benefits. The MPSERS board of trustees annually sets the employer contribution rate to fund the benefits. Participating employers are required to contribute at that rate.

Under Public Act 300 of 2012, members were given the choice between continuing the 3 percent contribution to retiree health care and keeping the premium subsidy benefit described above or choosing not to pay the 3 percent contribution and, instead, opting out of the subsidy benefit and becoming a participant in the Personal Healthcare Fund (PHF), a portable tax-deferred fund that can be used to pay health care expenses in retirement. Participants in the PHF are automatically enrolled in a 2 percent employee contribution into their 457 accounts as of their transition date, earning them a 2 percent employer match into a 401(k) account. Members who selected this option stopped paying the 3 percent contribution to retiree health care as of the day before their transition date, and their prior contributions were deposited into their 401(k) accounts.

The Academy's contributions are determined based on employee elections. There are multiple different pension and health care benefit options included in the plan available to employees based on date of hire and the elections available at that time. Contribution rates are adjusted annually by the ORS.

The ranges of rates are as follows:

	Pension	OPEB
October 1, 2019 - September 30, 2020	13.39% - 19.59%	7.57% - 8.09%
October 1, 2020 - September 30, 2021	13.39% - 19.78%	7.57% - 8.43%

Depending on the plan selected, member pension contributions range from 0 percent up to 7.0 percent of gross wages. For certain plan members, a 4 percent employer contribution to the defined contribution pension plan is required. In addition, for certain plan members, a 3 percent employer match is provided to the defined contribution pension plan.

The Academy's required and actual pension contributions to the plan for the year ended June 30, 2021 were \$25,687, which includes the Academy's contributions required for those members with a defined contribution benefit. The Academy's required and actual pension contributions include an allocation of \$10,542 in revenue received from the State of Michigan and remitted to the System to fund the MPSERS unfunded actuarial accrued liability (UAAL) stabilization rate for the year ended June 30, 2021.

June 30, 2021

Note 10 - Michigan Public School Employees' Retirement System (Continued)

The Academy's required and actual OPEB contributions to the plan for the year ended June 30, 2021 were \$6,420, which includes the Academy's contributions required for those members with a defined contribution benefit.

Net Pension Liability

At June 30, 2021, the Academy reported a liability of \$280,058 for its proportionate share of the net pension liability. The net pension liability was measured as of September 30, 2020, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of September 30, 2019, which used update procedures to roll forward the estimated liability to September 30, 2020. The Academy's proportion of the net pension liability was based on a projection of its long-term share of contributions to the pension plan relative to the projected contributions of all participating reporting units, actuarially determined. At September 30, 2020 and 2019, the Academy's proportion was 0.000815 and 0.000779 percent, respectively, representing a change of 4.60 percent.

Net OPEB Liability

At June 30, 2021, the Academy reported a liability of \$44,058 for its proportionate share of the net OPEB liability. The net OPEB liability for fiscal year 2021 was measured as of September 30, 2020, and the total OPEB liability used to calculate the net OPEB liability was determined by an actuarial valuation as of September 30, 2019, which used update procedures to roll forward the estimated liability to September 30, 2020. The Academy's proportion of the net OPEB liability was based on a projection of its long-term share of contributions to the OPEB plan relative to the projected contributions of all participating reporting units, actuarially determined. At September 30, 2020 and 2019, the Academy's proportion was 0.000822 and 0.000776 percent, respectively, representing a change of 6.01 percent.

Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

For 2021, the Academy recognized pension expense of \$45,756, inclusive of payments to fund the MPSERS UAAL stabilization rate. At June 30, 2021, the Academy reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	\$ 4,279	\$ (598)
Changes in assumptions	31,033	-
Net difference between projected and actual earnings on pension plan investments	1,177	-
Changes in proportion and differences between the Academy's contributions and proportionate share of contributions	10,662	(115)
The Academy's contributions to the plan subsequent to the measurement date	21,844	-
Total	<u>\$ 68,995</u>	<u>\$ (713)</u>

June 30, 2021

Note 10 - Michigan Public School Employees' Retirement System (Continued)

The \$10,542 reported as deferred inflows of resources resulting from the pension portion of state aid payments received pursuant to the UAAL payment will be recognized as state appropriations revenue for the year ending June 30, 2022. Amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Years Ending	Amount
2022	\$ 20,195
2023	14,671
2024	8,605
2025	2,967
Total	<u>\$ 46,438</u>

In addition, the contributions subsequent to the measurement date will be included as a reduction of the net pension liability in the next year.

OPEB Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to OPEB

For the year ended June 30, 2021, the Academy recognized OPEB recovery of \$195.

At June 30, 2021, the Academy reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	\$ -	\$ (32,827)
Changes in assumptions	14,527	-
Net difference between projected and actual earnings on OPEB plan investments	368	-
Changes in proportionate share or difference between amount contributed and proportionate share of contributions	4,398	(48)
Employer contributions to the plan subsequent to the measurement date	4,849	-
Total	<u>\$ 24,142</u>	<u>\$ (32,875)</u>

Amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized in OPEB expense as follows (note that employer contributions subsequent to the measurement date will reduce the net OPEB liability and, therefore, will not be included in future OPEB expense):

Years Ending	Amount
2022	\$ (3,847)
2023	(3,336)
2024	(2,642)
2025	(2,113)
2026	(1,644)
Total	<u>\$ (13,582)</u>

June 30, 2021

Note 10 - Michigan Public School Employees' Retirement System (Continued)

Actuarial Assumptions

The total pension liability and total OPEB liability as of September 30, 2020 are based on the results of an actuarial valuation as of September 30, 2019 and rolled forward. The total pension liability and OPEB liability were determined using the following actuarial assumptions:

Actuarial cost method		Entry age normal
Investment rate of return - Pension	6.00% - 6.80%	Net of investment expenses based on the groups
Investment rate of return - OPEB	6.95%	Net of investment expenses based on the groups
Salary increases	2.75% - 11.55%	Including wage inflation of 2.75%
Health care cost trend rate - OPEB	7.00%	Year 1, graded to 3.5% year 15, 3.0% year 120
Mortality basis		RP-2014 Male and Female Employee Annuitant Mortality tables, scaled 100% (retirees: 82% for males and 78% for females) and adjusted for mortality improvements using projection scale MP-2017 from 2006
Cost of living pension adjustments	3.00%	Annual noncompounded for MIP members

Assumption changes as a result of an experience study for the periods from 2012 to 2017 have been adopted by the System for use in the annual pension and OPEB valuations beginning with the September 30, 2017 valuation.

Significant assumption changes since the prior measurement date, September 30, 2019, for the OPEB plan include a reduction in the health care cost trend rate of 0.50 percentage points and the actual per person health benefit costs were lower than projected. There were no significant changes in assumptions for the pension actuarial valuation. There were no significant benefit terms changes for the pension or OPEB plans since the prior measurement date of September 30, 2019.

Discount Rate

The discount rate used to measure the total pension liability was 6.00 to 6.80 percent as of September 30, 2020 depending on the plan option. The discount rate used to measure the total OPEB liability was 6.95 percent as of September 30, 2020. The projection of cash flows used to determine the discount rate assumed that employee contributions will be made at the current contribution rate and that academy contributions will be made at statutorily required rates.

Based on those assumptions, the pension plan's fiduciary net position and the OPEB plan's fiduciary net position were projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan and OPEB plan investments was applied to all periods of projected benefit payments to determine the total pension liability and total OPEB liability.

June 30, 2021

Note 10 - Michigan Public School Employees' Retirement System (Continued)

The long-term expected rate of return on pension plan and OPEB plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

Asset Class	Target Allocation	Long-term Expected Real Rate of Return
Domestic equity pools	25.00 %	5.60 %
Private equity pools	16.00	9.30
International equity pools	15.00	7.40
Fixed-income pools	10.50	0.50
Real estate and infrastructure pools	10.00	4.90
Absolute return pools	9.00	3.20
Real return/Opportunistic pools	12.50	6.60
Short-term investment pools	2.00	(0.10)
Total	100.00 %	

Long-term rates of return are net of administrative expense and inflation of 2.1 percent.

Sensitivity of the Net Pension Liability to Changes in the Discount Rate

The following presents the net pension liability of the Academy, calculated using the discount rate depending on the plan option. The following also reflects what the Academy's net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower or 1 percentage point higher than the current rate:

	1 Percentage Point Decrease (5.00 - 5.80%)	Current Discount Rate (6.00 - 6.80%)	1 Percentage Point Increase (7.00 - 7.80%)
Net pension liability of the Academy	\$ 362,487	\$ 280,058	\$ 211,742

Sensitivity of the Net OPEB Liability to Changes in the Discount Rate

The following presents the net OPEB liability of the Academy, calculated using the current discount rate. It also reflects what the Academy's net OPEB liability would be if it were calculated using a discount rate that is 1 percentage point lower or 1 percentage point higher than the current rate:

	1 Percentage Point Decrease (5.95%)	Current Discount Rate (6.95%)	1 Percentage Point Increase (7.95%)
Net OPEB liability of the Academy	\$ 56,597	\$ 44,058	\$ 33,501

June 30, 2021

Note 10 - Michigan Public School Employees' Retirement System (Continued)

Sensitivity of the Net OPEB Liability to Changes in the Health Care Cost Trend Rate

The following presents the net OPEB liability of the Academy, calculated using the current health care cost trend rate. It also reflects what the Academy's net OPEB liability would be if it were calculated using a health care cost trend rate that is 1 percentage point lower or 1 percentage point higher than the current rate:

	1 Percentage Point Decrease (6.00%)	Current Rate (7.00%)	1 Percentage Point Increase (8.00%)
Net OPEB liability of the Academy	\$ 33,096	\$ 44,058	\$ 56,525

Pension Plan and OPEB Plan Fiduciary Net Position

Detailed information about the plan's fiduciary net position is available in the separately issued MPSERS financial report.

Payable to the Pension Plan

At June 30, 2021, the Academy reported a payable of \$1,918 for the outstanding amount of contributions to the pension plan required for the year ended June 30, 2021.

Pension Information

Ultimately, 10 years of data will be presented in both of the pension-related schedules. The number of years currently presented represents the number of years since the accounting standard requiring these schedules first became applicable.

Benefit Changes

There were no changes of benefit terms for each of the reported plan years ended September 30.

Changes in Assumptions

There were no significant changes of assumptions for each of the reported plan years ended September 30 except for the following:

- 2019 - The discount rate used in the September 30, 2018 actuarial valuation decreased by 0.25 percentage points.
- 2018 - The discount rate used in the September 30, 2017 actuarial valuation decreased by 0.45 percentage points. The valuation also includes the impact of an updated experience study for the periods from 2012 to 2017.
- 2017 - The discount rate used in the September 30, 2016 actuarial valuation decreased by 0.50 percentage points.

OPEB Information

Ultimately, 10 years of data will be presented in both of the OPEB-related schedules. The number of years currently presented represents the number of years since the accounting standard requiring these schedules first became applicable.

Benefit Changes

There were no changes of benefit terms for each of the reported plan years ended September 30.

Changes in Assumptions

There were no changes of benefit assumptions for each of the reported plan years ended September 30 except for the following:

- 2020 - The health care cost trend rate used in the September 30, 2019 actuarial valuation decreased by 0.50 percentage points, and actual per person health benefit costs were lower than projected. This reduced the plan's total OPEB liability by \$1.8 billion in 2020.
- 2019 - The discount rate used in the September 30, 2018 actuarial valuation decreased by 0.20 percentage points. The valuation also includes the impact of an updated experience study for the periods from 2012 to 2017. This resulted in a lower than projected per person health benefit cost to reduce the plan's total OPEB liability by an additional \$1.4 billion in 2019.
- 2018 - The discount rate used in the September 30, 2017 actuarial valuation decreased by 0.35 percentage points. The valuation also includes the impact of an updated experience study for the periods from 2012 to 2017. This resulted in a lower than projected per person health benefit cost to reduce the plan's total OPEB liability by \$1.4 billion in 2018.
