

Recruitment: UX/UI Designer

Job Description

We're looking to add a lead UX/UI designer to the Papertrail platform team, to design and prototype new features and the next version of Papertrail. The new Papertrail design will include extra functionality, multi language capability and enhanced configuration options for our corporate clients. This version of papertrail will propel all our customers and partners into the future by also giving them Papertrail analytics.

Version 3.0 of Papertrail will include improved onboarding for resellers and corporate customers. Manufacturer partners will have the ability to edit product data and customers will be able to customise, set up integrations and configure their accounts themselves without having to work with our customer support or technical team.

Papertrail has 700+ subscribers, International partners and global manufacturers ready to migrate. This role will inform the priority list and support our world class engineering team to design a beautiful product roadmap. All existing and new feature developments are going to be validated with simple and effective prototypes that get our customers so excited that they're signing up for early access, and long term commitments, to not miss out.

This full time role will allow you to influence the future design, look and feel of the papertrail applications, elevating our brand and trusted presence in the global height safety and renewable energy markets.

What you'll be doing

- Work alongside the existing product team to design and produce the final designs for the new Papertrail web application.
- Analyse users product feedback and produce a refreshed vision of the web application.
- Design and prototype new features for the future application to meet customer requirements.
- Understand the UX/UI Requirements for all customer segments including those currently not serviced by our applications, which feature on our product roadmap.
- Produce a design system for our web and mobile applications, speeding up our development team.

- Increasing the development velocity of the team by contributing to comprehensive design and resource briefs.

Skills

- Ability to listen, communicate, understand and prioritise your work.
- Produce simple and engaging wire-frames and prototypes.
- Produce presentations and relevant documentation and collaterals that support the product design and application experiences.
- Proficient in HTML / CSS.
- Competent with industry standard design & prototyping tools.
- Qualitative and quantitative analysis of user feedback.

Experience

Worked on large SaaS product design at a similar stage to the product lifecycle of Papertrail

- Examples of beautiful and intuitive digital designs that work across desktop and mobile.
- History of working with users to feedback into software products.
- Creating comprehensive and consistent design systems.
- Creation of HTML, CSS, image and other design resources for a fast moving development team.
- Working in an Agile environment.
- Worked within a remote and mixed skills team.
- Using the technology and applications which supports the design process. (Design, Prototype and communication tools).

Why join us

Working at Papertrail will accelerate your career and give you the opportunity to work with world-class talent. We're a team that loves what we do and we thrive on our ability to make an impact. There are many benefits that come with working with us such as:

- The opportunity to contribute, from an early stage to the new Papertrail applications, ready for all existing subscribers to migrate to.
- Flexible and remote working.
- All the tools you need to execute your job well.
- Future career opportunities as the business grows.
- See your initiatives and strategies deliver results.
