papertrail

Job Description - React Native Mobile Developer

Here at Papertrail, we are growing our development team! We are looking to recruit a React Native mobile developer to work directly within our Platform team to continue to build new features and maintain the Papertrail mobile applications. Our iOS and Android applications are a key component of the Papertrail platform solution for customers accessing Papertrail remotely and capturing inspections offline, ensuring that they have maximum benefit for their equipment and safety management. Our digital safety inspection management system is deployed in a wide range of industries and sectors.

We are a software company that helps safety conscious businesses and equipment owners around the world to reduce their paperwork and stay compliant. We are a team united by our shared values of working hard, being accountable and working together.

The Papertrail team work remotely, with a virtual hub in North Wales. Our customers and partners include global manufacturers of safety equipment, renewable energy companies and adventure parks around the world, with customers on every continent.

If you're a person who is driven by delivering solutions via technology, then this is the role for you.

What you'll be doing:

- Working with our product owner and UX designer to implement new features in our mobile applications
- Maintaining and upgrading legacy code and libraries
- Implementing e2e testing to streamline our test processes
- Being responsible for the deployment and release processes of the mobile applications
- Identifying and unblocking any issues or bugs, to Improve the overall usability and performance of the application

Extra awesome:

- Experience of working on React web applications
- Experience with CI / CD and tools such as Docker
- Collaborating with others to help develop and drive best practices
- Working directly with colleagues to achieve success and a high level of satisfaction
- You love inspiring others with your enthusiasm
- You have a 'never say never' attitude
- Creative and thinks outside the box

The following experience is relevant to us:

- Building and maintaining React Native applications.
- Experience in Legacy applications and refactoring
- TypeScript with React Native
- Redux
- e2e testing (Detox or Appium)
- Continuous integration and delivery of React Native applications
- Appstore and Google Play management
- Experience of working with UX / UI designers and design systems
- Git, Jira, Confluence, Firebase, Sentry

Why join us?

Working at Papertrail can accelerate your career and give you the opportunity to work with world-class talent. We're a team that loves what we do and we all thrive on our ability to make an impact. There are many benefits that come with working with us, such as:

- Flexible and remote working
- All the tools you need to execute your job well
- Future career opportunities as the business grows
- See your initiatives and strategies deliver results

Holiday entitlement starts at 23 days per year increasing with time in post. Working hours are 9-5 nominally. You will be contracted to work 35 hours per week, Flexible working hours will be considered. Applicants will be considered 2 hours either side of GMT.

Apply today by emailing us your CV and covering letter to recruitment@papertrail.io
