

K&A Licensing and Permitting Services

Overview

K&A Engineering Consulting, P.C. provides clients with a straightforward and cost-effective approach to Licensing and Permitting. Our dedicated team will ensure your project remains compliant, on schedule, and within budget while preserving the environment and adding value to our communities. Work with us on project planning to complete resource assessments, streamline regulatory coordination, and secure necessary authorizations.

Unique abilities:

By having a complete understanding of the project lifecycle, K&A Engineering Consulting, P.C. understands the criticality of completing your project on schedule and within budget. By remaining agile and fully immersed in our projects, we can tailor our approach for each client. We understand project environmental drivers during the planning stage and ensure integrating surveys and permitting time frames into the project schedule and change management.
