Screens & Surfaces

Maximize your projector's output

The brightness of projections not only depends on the lumens output of your projector, but on the surface you're projecting on. Different surfaces have the ability to absorb, reflect or diffuse light to meet your technical and production needs. BMD supplies four different surface types - from cost-effective surface paint and muslin drops to Ambient Light Rejecting technology that gives you the freedom to use projections alongside bright lighting design.

The Screens & Surfaces line-up

Hanging Fabric Surface

Our pre-sewn and finished raw muslin fabric is the most economical and commonly-used material for front projection. This surface comes with all the finishes to attach to your grid and can be weighed down for a smooth-tight projection surface. Ideal for a stage that requires flexibility, the surface can be installed and removed simply without damage to the fabric.

Reflective Surface Paint

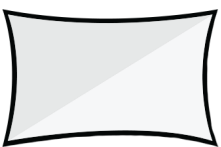

Turn any wall or structure up to 20'x40' into a highly-reflective front-projection surface with our high contrast Reflective Surface Paint. Designed for the budget-minded and creative theatremaker, this surface paint is made complete by non-reflective border tape.

REAR PROJECTION

Tie-down Screen

A reflective material for all-round use, it's flexible and easy to fold for storage in-between uses (and readily stretches back out again to hide fold lines and wrinkles) making it our most versatile Ultra-Short Throw-compatible projection screen material. The material is has a grey tint, making it perfect for minor issues with ambient light.

Fixed Frame ALR Screen

The Fixed Frame ALR Screen is our premium solution for super bright theatrical projections in moderate to high ambient stage light conditions. Featuring a lightweight, tool-less truss design, this screen is significantly stronger than truss folding screens. The surface can reject 57% of off-axis ambient light, allowing it to achieve high contrast while still providing extremely wide viewing angles.

Only the products you actually need.

We work differently than a traditional A/V company. The team at Broadway Media has spent years testing and refining the Screens & Surfaces line up to meet your needs. Doing away with an alphabet soup of product names and unlimited variations, we've narrowed our offering to four products that suit everyone from the budget-conscious to the tech wizards.

Project shadowless digital scenery with StageProjectors and Screens.

- Action should take place 5ft downstage (or further) from the projection surface to avoid shadows.
- All our Screens and Surfaces are compatible with ultra short-throw front projectors, making for a fantastic theatrical experience.

- 3 Lower the brightness of your stage lights, use blue and purple hues, and use spotlights to track movement and action.
