

IoT Platform Visualize your assets in real-time

Keep track of important assets

Track and trace moving objects, such as people, machinery, and equipment. MazeMap allows you to tag your assets with either BLE, RFID, or GPS to create a visual overview of where your chosen assets are located.

For hospitals: locate vital equipment

Our asset tracking feature allows hospitals to keep track of important equipment, such as IV pumps, ventilators, beds, and wheelchairs. Assets can be viewed live on the map and you can see a calculation of how long it will take you to navigate to them, saving medical staff valuable time.

JavaScript API

Our JavaScript API allows you to build on top of your maps to create an interactive experience. You can find out more about our API [here](#)

If you'd like to discuss how MazeMap can help out your organization, get in touch for a non-committal chat.
