

# SANQUAT

## GENERAL DESCRIPTION

**Sanquat** is a powerful liquid sanitizer, disinfectant, virucide and fungicide. When evaluated by accepted laboratory procedures, Sanquat provides superior germicidal and fungicidal activity far beyond that achieved with some currently available quaternary ammonium compounds. Sanquat is accepted for use in federally inspected plants without a potable water rinse at concentrations up to 200 ppm. Effective against *Listeria monocytogenes* (200 ppm). Effective against poultry viruses and gram negative organisms.

## PHYSICAL PROPERTIES

---

**APPEARANCE:** clear, colourless liquid  
**% QUATERNARY AMMONIUM:** 10.0%

**ODOR:** mild  
**DENSITY:** 0.99 kg/L

**pH (1% solution):** 6-7  
**HARD WATER STABILITY:**  
excellent

---

## DIRECTIONS FOR USE

### **Sanitizing of Food Processing Equipment and Other Hard Surfaces in Food Contact Locations:**

Apply a solution of 20 mL of Sanquat per litre of water (this will provide 200 ppm active quaternary solution). Allow surfaces to drain prior to use.

**Disinfection of Hatchery Equipment:** Apply a solution of 60 mL of Sanquat per litre of water (this will provide 600 ppm active quaternary solution).

## CAUTION

Safe for use on all surfaces.

## SAFETY

When handling concentrated chemicals, follow the guidelines listed in the Safety Data Sheets (SDS). PPE must be worn at all times. Avoid contact with skin, eyes or clothing. In case of skin contact, flush with plenty of water and clean with mild soap. In case of eye contact, flush with plenty of water for 15 minutes and seek medical attention.
