won

Long passes /  
accurate

Passes to penalty  
area / accurate

Dribbles /  
successful

Offensive duels /  
won

# TACTICAL ANALYSIS

**Offensive duels**

Is a player with a great offensive 1v1 capacity. He is quick to cut and dribble into open spaces, but he is even better to show up in small-sided spaces, regardless being marked by two. He uses his body well to hide the ball and his leg agility to dribble. If having chances, he will win the individual duel.

**Vision of play**

He leverages his individual technique to put teammates in play in the last third. He makes it with accuracy, and by filtering balls in behind the rivals. It helps his team creating goal chances. He can move up front when having the ball, waiting for the ideal moment to pass through the lines.

**Shots**

His shooting technique is good enough to take set pieces, besides the other great shooters his team has. He can shoot mid-range shots in movement as well, when having space, but he rather shoots on the ground.

# TACTICAL ANALYSIS

**Associations**

He is a key player in the associative play. He mixes his individual technique with the dynamism he offers to collaborate when creating play. He understands how to drop back to become an option of pass. Also, he is capable of combining on one-two touches to destabilize the rival.

**Defensive work**

He is a footballer with sacrifice. Even his offensive role, he is capable of pressing high with intensity if needed. Also, he knows once he recovers the ball, he has to pass it to avoid pressure. When playing inside, he is a key player to regain possession.

**Dynamism**

Both for positional and direct play, he is an important player. He can play near the sideline, but he centralizes his position to associate and end up on the opposing side. He is smart to attack open spaces and move around to keep playing fluid. He generates play.
