## FORWARD RUNS

He plays on the outside lane most of the time, but he is also able to play on the inside zone. He passes the ball and then moves to look for continuing the action. He has good timing to try lateral crosses.

## BUILDING-UP FROM THE BACK

He has calm to pass. He participates by moving near the center-back's zone, which makes an option to advance. He is smart to attract the rival and then pass the ball by making a penetrating pass.

## LATERAL CROSS

In open play, he is capable of winning through his top speed and then timely cross to find a teammate in a goal-scoring chance. He positions himself well in lateral crosses to be accurate in the deliveries.

## ASSOCIATIVE SKILLS

He goes back and forth to generate superiorities or equality in attack. He has good associative skills. He plays at one touch and goes forward. Also, he has technical quality to control and drive the ball.
