Acting on the “ACT” Score: What an Asthma Control Test Can Do for You

The second in a series of webinars focused on treating, managing and measuring asthma

March 24, 2021

12:00 PM – 1:00 PM CST

[REGISTER](#)

Featuring

Dr. Nicholas Antos, Children’s Wisconsin

Asthma affects more than 400,000 adults and over 100,000 children in Wisconsin. It is a public health priority to ensure people with asthma can properly manage and control their disease.

WCHQ and the Wisconsin Department of Health Services, Bureau of Environmental and Occupational Health are hosting a series of webinars to help clinicians measure and improve care for their patients with asthma.

The second webinar, March 24, 2021, noon – 1 PM, will feature Nicholas J. Antos, MD. Dr. Antos, a pediatric pulmonologist at Children’s Wisconsin. Dr. Antos will present a reprise of the discussion on multiple asthma control tests, including usage, differences, and clinical relevance. Additionally, he will discuss how providers can help support asthma in the schools, including through the usage of Asthma Action Plans and include information on a free MOC IV opportunity for those interested. This work is now supported by a new SAMPRO bill.

Topics Include:

1. Self-reported measures of asthma control, such as the Asthma Control Test
2. The role of health systems/primary care practices as it relates to the school
3. Clinical benefits of asthma plans for those in school

About Our Presenter

Nicholas Antos, MD, is the Director of the Cystic Fibrosis Center at Children’s Wisconsin and the Medical College of Wisconsin and the medical director of the Southeastern Wisconsin School-based Asthma Management Program (SAMPRO). He is on faculty at the Medical College of Wisconsin and Children’s Wisconsin and is an Assistant Professor of Pediatrics. Aside from clinical practice, Dr. Antos’ research work has focused on using quality improvement methods to improve the care of children with chronic respiratory diseases and specifically cystic fibrosis and asthma.

Wisconsin Asthma Coalition. In addition to leading local SAMPRO initiatives, Dr. Antos is part of the national AAAAI Office of School-based Management of Asthma and SAMPRO taskforce.
