

IMPACT REPORTING

Impact data & analytics are no longer optional for founders seeking impact capital. Impact investors "universally agree" on the importance of measuring and managing social & environmental impact. Our analytics uniquely engage investors by evaluating the efficiency of a business model as a lever for impact, and the magnitude of the impact it creates per dollar of capital invested.

Every ImpactableX Certified company receives a full company report that includes four tiers of analytics and all supporting references, projections & calculations - backed by ImpactableX certification.

SAMPLE REPORT

Founders are able to reference third-party verified impact data and articulate their company's impact potential with credibility, clarity and confidence.

CERTIFIED IMPACT

We certify companies who meet our rigorous standards.

- Alignment with the UNSDGs
- Reference to the highest standard of research & data available
- Approval from trained analysts

Once we certify the fundamental relationship between revenue and impact, impact tracking becomes a function of revenue generation. We automate regular impact tracking to gauge alignment with and progress towards impact projections.

BUILD & INVEST IN COMPANIES THAT DEMONSTRATE MEANINGFUL, MEASURABLE IMPACT
