

How Mission Medicine works

A message from the founders

We are excited for you to be a part of our journey in positively impacting as many students as possible in their journey to medical school. We, as medical students, know all too well that it's a tough journey with plenty of challenges. It is our job to make it as easy for them as possible, equip them with knowledge to flourish at each stage of the application and produce a generation of confident, competent first year medical students.

Thank you for being a part of it.

The basics

We are a company that provides high quality, bespoke tuition to medical applicants

We want to deliver an amazing service and get as many of our customers into medical school as possible. This is where you come in!

You will be interacting with our customers from the moment they join us, via the free consultation (more on this later) and then by delivering tutor sessions

Your role is therefore three-fold:

1. Provide free consultations to help understand how we can help the customer
2. Create quality resources using the Mission Medicine curriculum and guidance
3. Deliver fantastic tutor sessions

We are a company that thrives on collecting and responding to feedback. This way we can ensure that we always improving. We want to be the best in the field of medicine application tuition, and we are excited for you to contribute to this goal!

Ways to earn with Mission Medicine

There are **5** ways that you can earn money by working with us:

Tutoring – the mainstay of your work with us, delivering quality tuition each and every time

Ambassador – if you are responsible for getting us a customer, be it through word of mouth or via social media, let us know by completing the online form in the Tutor Portal (Ambassadors page) and we will pay you £30 if they purchase a minimum of 5 hours tuition

Lessons – when you create content for us, we believe you should be compensated. For every lesson you create that is accepted by us, we will pay you £10

Free consultations – you are the first person our customers speak to, we want you to shine. You are paid the normal Mission Medicine rates of £5 per 15 minute consultation. However, if that customer goes onto purchase tuition we will pay you an additional £5 bonus. £10 for approximately 15 minutes work!

Questions – writing practice questions and populating our question banks is fundamental for us moving forward. We will pay you per question you produce that is accepted by us. For more information see our Author's Guide

The free consultation

This is your first contact with the customer and hopefully after speaking with you for 15 minutes, they will be signing up for tuition with you as soon as they can

When a customer has a free consultation with you, you become their tutor. So please only sign up for more free consultations if you are looking to carry out more tutor sessions each week

You will only be assigned free consultations when you have:

1. Told us you want more tutees by checking the correct box in Acuity Scheduling (there is a whole set of instructions for this!)
2. Made yourself available on Acuity by setting your availability and syncing it with your calendar (more instructions!)

We provide you with a proforma and instructions on how to carry out the free consultation to make the process as smooth as possible

Finally, to reward you for all your hard work, aside from your normal compensation of £5 per free consultation (£20/hour), if the customer goes on to purchase tuition with you, you will receive another £5. That is £10 for approximately 15 minutes work!

Tutor sessions

The focus of Mission Medicine is one-to-one tutor sessions. We have designed an entire curriculum and guidance on how to write tutor sessions. We are continually updating this by responding to feedback from yourselves and tutees, and part of your role is to create lessons and other resources to be delivered during sessions with your tutees

As always, there is plenty of guidance on how to create lessons how to write questions for the BMAT and UCAT. This becomes especially important in the 'simulate' portion of the Mission Medicine system (see the 'resource creation' guides) where we recreate exam conditions to ensure our tutees are prepared for the rigors of exam day

If you see a text box like this in the guidance this is for 'holistic tutoring.' We work on the aspects of preparation for medical school that cannot be found in a textbook. This includes dealing with performance anxiety, public speaking, and stress management. This is how we prepare them for medical school and beyond. It has a profound impact on a candidate's performance and should be integrated liberally within sessions

We ask our tutees for feedback after every single session that they have with you. This is so we can continually and consistently improve our service. If you don't ask, you don't improve!

How it all works from start to finish

Below is a diagram that will help you understand how the Mission Medicine process works for both you and the customer:

What does the customer do?

What do I do?

I have a question!

Can't find the answer?
