

GUN MISFIRES KEEPING YOU DOWN?

REAPER

WHY REAPER

Longbow Completion Services has changed the way frac plugs operate with its innovative INFIL technology. The revolutionary REAPER frac plugs remove risk associated with “ball-in-place” misfires and help you recover efficiencies lost during ball-drop operations.

INNOVATIONS

What REAPER does for you.

- Eliminates ball pump-down — the plug provides isolation on command with our field-proven **INFIL** technology (patent pending) saving time and fluid compared to ball drop frac plugs
- No flowback or ball catch
- No risk when perforation guns fail to fire
- Effortless mill outs (~6-8 minutes per plug, no motor)

SPECIFICATIONS

Casing Size in.	Weight lbs.	Tool OD in.	Tool ID in.	Tool OAL in.	Temp Max (F)	Pressure psi
5 1/2	17-20	4.30	1.00	20.75	250	10,000
