## Profile

I'm a Product Designer with 4+ years of experience in designing simple, elegant, data-driven, user-centric experiences that delight users. Defining the user experience, interactions, and user interfaces through user flows, information architecture, sketches and wireframes, and visual design. Shaping the product strategy and vision for clients from many different sectors, from startups to big corporations. Collaborating closely with stakeholders and engineers to ensure high-quality implementation from start to finish.

## Skills

Ability to adapt to constant change,  
Great teamplayer and mentor for new designers,  
Strong teamwork and communication skills,  
Experience working on design systems,  
Meticulous attention to detail.

## Experience

### Product Designer

Hatched Labs | Remote (San Francisco, USA) | March 2020 - Currently

Working on conducting research, user testing, ideation, wireframes and high fidelity polished user experiences and user interfaces for iOS, Android and Web platforms. Collaborating with engineers, product managers and outside stakeholders. Creating data-driven and human-centric designs.

## Languages

Polish, Native

English, Advanced (C1)

### Product Designer

Netguru | Remote (Poznań, PL) | June 2018 - March 2020

Creating clean, effective, UI/UX-driven web and mobile interfaces, ensuring high-quality results, managing internal and external team design projects, mentoring newly joined designers, aligning designs with client business goals, close collaboration with developers and engineers.
