

Desktop as a Service (DaaS)

Use Cases in the Healthcare Industry

Use Case: Quicker workforce integration post M&As

The Business Need

The pharmaceutical industry is grappling with multiple challenges – decline in blockbuster drugs, shift toward specialty drugs, threat from biosimilars and generics, complex supply chains, regulatory norms, and pricing pressures. Firms have responded in a number of ways to these challenges, including strategic M&As. With many business users crossing over, IT comes under pressure to quickly onboard and provide them with workspaces and devices.

DesktopReady Advantage

DesktopReady can be rapidly scaled to provide new employees from with access to the parent organization's custom platforms, tools, and productivity suites. Virtualization technology allows employees to use devices already in their possession, bypassing the need to execute costly and time-consuming device procurement cycles.

Benefits

- Quicker realization of targeted M&A synergies
- Reduced productivity drops due to seamless workplace transfer
- Reduced risk of breaches due to access from non-standard devices

About DesktopReady

DesktopReady is a modern fully managed Desktop as a Service (DaaS) with built-in automation and monitoring that simplifies the delivery and management of cloud desktops for the unique needs of companies that want to spend less time on IT. Developed using Windows Virtual Desktop (WVD) infrastructure within the Microsoft Azure cloud, DesktopReady provides fully functional Windows 10 desktops that are easy to install, configure and ready within minutes. The highly secure cloud desktops are built on platforms that are PCI, HIPAA and SOC2 compliant and supported by 24/7 service desk and infrastructure monitoring.
