## **Debrief of Election Stages & Complaints**

**Nomination Period:** March 8 – March 15

We received over 100 nominations during the entire nomination period. As mentioned earlier, not all positions had people running for them so we extended the nomination period by 3 days in accordance with the Standing Regulations. This is standard election procedure. The CEO and Elections Coordinator held a candidate information session on Saturday, March 13th which was recorded and sent to all candidates. In this information session we notified

candidates of our additional election directives (as allowed by the Standing Regulations) along with the basic election rules. Given the fully online nature of this election, we worked to make the rules as clear and fair as possible while also allowing students to reach out to as many students as possible. Lastly, we made a complaint form accessible to electors and candidates.

### **Campaign Period:** March 15 – March 22

As CEO and Elections Coordinator we made ourselves available every day to answer any questions MAs or candidates had. We assigned each MA CEO to three MAs each. They were to supervise the online activity of all candidates under their assigned MA and answer their questions pertaining to the rules. Candidates were expected to notify their assigned elections supervisor of the online groups/pages they would be posting on and share the campaign material they would be working on. We received a complaint regarding an ASFA exec candidate who was sharing erroneous information on the election and hadn't taken the time to make sure his campaign posts complied with election rules. Candidate was sanctioned financially. Also, a group of candidates had set up a discord group for this election and the set up process of this discord was completed a few days before the start of the campaign period. To some, this could be interpreted as campaigning before the campaign period. Slate was sanctioned by asking them to refrain from using Slate for a determined period. Furthermore, we received a complaint about the length of candidate bios on the election's website. This complaint was thrown out as it was deemed not serious enough for us to deal with it. Lastly, we received a complaint about a tweet from a candidate that compared an opposing team's graphics to that of a far-right political organization from the USA. We sanctioned the candidate accordingly.

### **Polling/Voting Period:** March 23– March 26

We faced an unforeseen technical issue at the start of the voting period which we addressed as quickly as possible. The rest of the

voting period was marked with very little other technical or logistical issues. The CEO and Elections Coordinator made themselves available at all hours to quickly trouble shot any minor, individual issues voters were having with the platform. One candidate took part in online behavior that could be interpreted as campaigning past the campaign period. Given the context on this candidate and the election they had been running up to that point, we issued a warning. Voting period ended without any other complaints and election results were posted at night on the 26.

Expenditure Explanation

The total amount spent for both elections is \$10,931.79 which falls well under the \$14,870 amount set aside for these elections in the global elections budget approved by ASFA Council in June 2020.

ASFA shares its Simply Voting subscription with CSU and we were informed by the CSU during the winter term how much we owed them for our portion of the subscription. ASFA General Manager confirmed it was paid shortly thereafter. ASFA paid \$2,004.30 for our use of Simply Voting for the full academic year (covering 2020 By-Election and 2021 General Election). Although this expense covers both elections, we paid the fee in the winter term and as such, we calculate this fee as part of the General Election expenditures in ASFA election budgets. ASFA was charged around \$1,835.85 for this service for the previous year, so there was a moderate increase in price for the service which is to be expected. Nonetheless, future election organizers should keep an eye on this price to see if it rises again next year and by how much.

The total amount of the MA CEO honorariums was estimated to be \$3,600 for each election. During the By-Election we spent \$1,500 on

that expense as more Member Associations chose to fill vacancies through general assemblies. Nonetheless, 11 Member Associations participated in the By-Election. For the General Election, we reached the exact budget projection of \$3,600 for that category.

We followed the Standing Regulations when assigning a maximum of 3 Member Associations to each MA CEO and followed the exact payment structure set out in Standing Regulations which indicates that these workers are to be paid \$200 for their first MA and \$100 for each subsequent MA overseen. As has been done before, we gave the DEOs MA CEO responsibilities as well and paid them according to those added responsibilities as set out in the Standing Regulations.

During the By-Election, only one ASFA candidate spent money on campaign materials. On the MA side of the election, only one candidate spent money on campaign materials (roughly \$10). However, despite repeated requests, that candidate was unable to provide an adequate invoice with basic expense information as is required of MA candidates according to Standing Regulation 156. Therefore, in order to prevent fraudulent expenses and follow election rules, no money was reimbursed to that MA candidate. During the General Election, 11 Candidates requested to be reimbursed. In order to facilitate the reimbursement process sometimes candidates filed shared slate charges under themselves, but we made sure that all these charges were legitimate and in accordance with election rules in close consultation with ASFA staff. One candidate didn't provide sufficient proof along with their request for reimbursement and had been sanctioned \$30 at the beginning of the election period. Given that this candidate had requested to be reimbursed \$29 but they owed ASFA \$30 we subtracted that \$30 from the reimbursement requested. As such, we did not reimburse this candidate as, when taking into account the sanction, they actually owed us \$1, which we decided to wave as we felt such a meager fee wasn't worth the time and money ASFA employees would have to spend getting in touch with that candidate. Given there were more ASFA exec candidates in the General Election compared to the By-Election, it makes perfect

sense that the candidate reimbursement amount is higher now as ASFA executive candidates are allowed a larger budget.

## **Recommendations**

1. Adjustments to honorarium for Chief Electoral Officer, Elections Coordinator, DEOs and MA CEOs.
2. Given the demands of these roles, the Chief Electoral Officer and Elections Coordinator need to be given more comprehensive and structured onboarding and training with updated training guides.
3. Rewrite the task distribution of the Chief Electoral Officer and Elections Coordinator in the Standing Regulations as there is too much overlap regarding the responsibilities of each role as it stands currently.
4. Clarify the rules around the support executives can give to candidates during the election process. There are concerns that

some executives show favoritism when sharing knowledge about campaigning and the election process with candidates.

5. There should be a more comprehensive list of election violations and their connecting consequences (either in By-Laws or accessible to nominees) to build a fairer baseline for sanction evaluations. Raise awareness on the likelihood of sanction-application.

6. Rethink the maximum amount of Member Associations each MA CEO can oversee.

7. Create comprehensive and clear regulations in the Standing Regulations that concern online campaigning.

8. Elections team need to get access to the ASFA elections Facebook page or consider remaking a new page. This page would allow us to easily communicate election information openly as there seem to be repeated issues throughout ASFA of certain emails lists not being up to date. As such, information doesn't get to everyone at the same time.
