<tr>
<td></td>
<td>ASI Evolution RPR Titration Diluent contains human or defibrinated plasma with 0.1% sodium Azide as a preservative. All components derived from human source materials have been tested at the donor level and found to be nonreactive for HBsAg and for HIV-1, HIV-2 and HCV antibodies. Because no known test offers complete assurance that infectious agents are absent, all materials derived from human blood should be handled as if capable of transmitting infection.</td>
