

ShireSystem maintenance and facilities management software

ShireSystem by Elecosoft is a maintenance and facilities management software is used globally by thousands of users for improved asset visibility and planned preventative maintenance.

ShireSystem delivers rapid return on investment resulting in an immediate, positive impact on your business by saving you time and money.

Why choose ShireSystem?

- Cost effective maintenance software.
- Easy-to-use software with a user-friendly interface.
- Choice of rapid setup of on-premise, cloud and mobile versions.
- Scalable solutions, confidently manage your operations from one scalable software.
- Expertise and support, a dedicated helpdesk with industry knowledge built over 30 years.
- Empowered workforce, using dashboards, KPIs and statistics in real-time on-premise, online and/ or mobile.
- Simple integration and rapid setup using Microsoft SQL server and .Net technology.
- Versatile API provides seamless integration with third party applications.
- Supports business objectives with comprehensive KPIs to make data driven decisions.

Maintenance made simple

Record assets in one easy-to-use software solution: ShireSystem tracks work orders, schedules tasks, records meter readings, creates checklists, records asset history and manages stock and inventory.

With the click of a button, users can:

- Improve productivity
- Reduce costs, downtime and disruption
- Manage safety and risk management
- Effectively allocate resources
- Increase visibility through detailed reporting
- Ensure regulatory compliance
- Monitor performance

Stay connected when mobile

Our mobile solutions enable your workforce to stay mobile whilst on the job.

The team at Elecosoft can advise on a range of devices including ruggedised, drop tested, submersible, IP67, ATEX compliant and barcode or RFID scanner enabled.

ShireSystem grows with your business

As your requirements grow, our modular solution allows you to add on additional functionality, including:

- Work requester
- Stock and inventory control
- Purchasing
- Costs and charges management (ideal for contractors)
- Management KPIs and reporting
- Resource planner (team calendar view)
- Engineer's diary
- Mobile app

Training and implementation

We offer ShireSystem training at Elecosoft training centres around the UK. The courses provide practical hands-on instruction, as well as tips and tools to apply in the workplace, and are supported with takeaway training materials. If you need a more tailored solution, we also deliver bespoke training at customer offices.

Courses include:

- Maintenance user
- Maintenance set up
- Stock control
- Purchasing
- Super user

Our consulting service offers an implementation solution, tailored to suit individual customer requirements. Let us take control of setting up the system and transferring data to save you time and resource.

“The complete CMMS.”

Chris Drury, Ferrero

Support when you need it

Elecosoft provides comprehensive support for all our software products. The ShireSystem helpline provides a first port of call for any questions regarding:

- Installation
- Use of the software
- Diagnosis and resolution of reported problems

The service is available to customers with a current support agreement or those who are evaluating ShireSystem software, prior to purchase.
