

Site Progress Mobile

Record project progress quickly and easily via mobile devices

Flexible site-to-office progress reporting that enables you to:

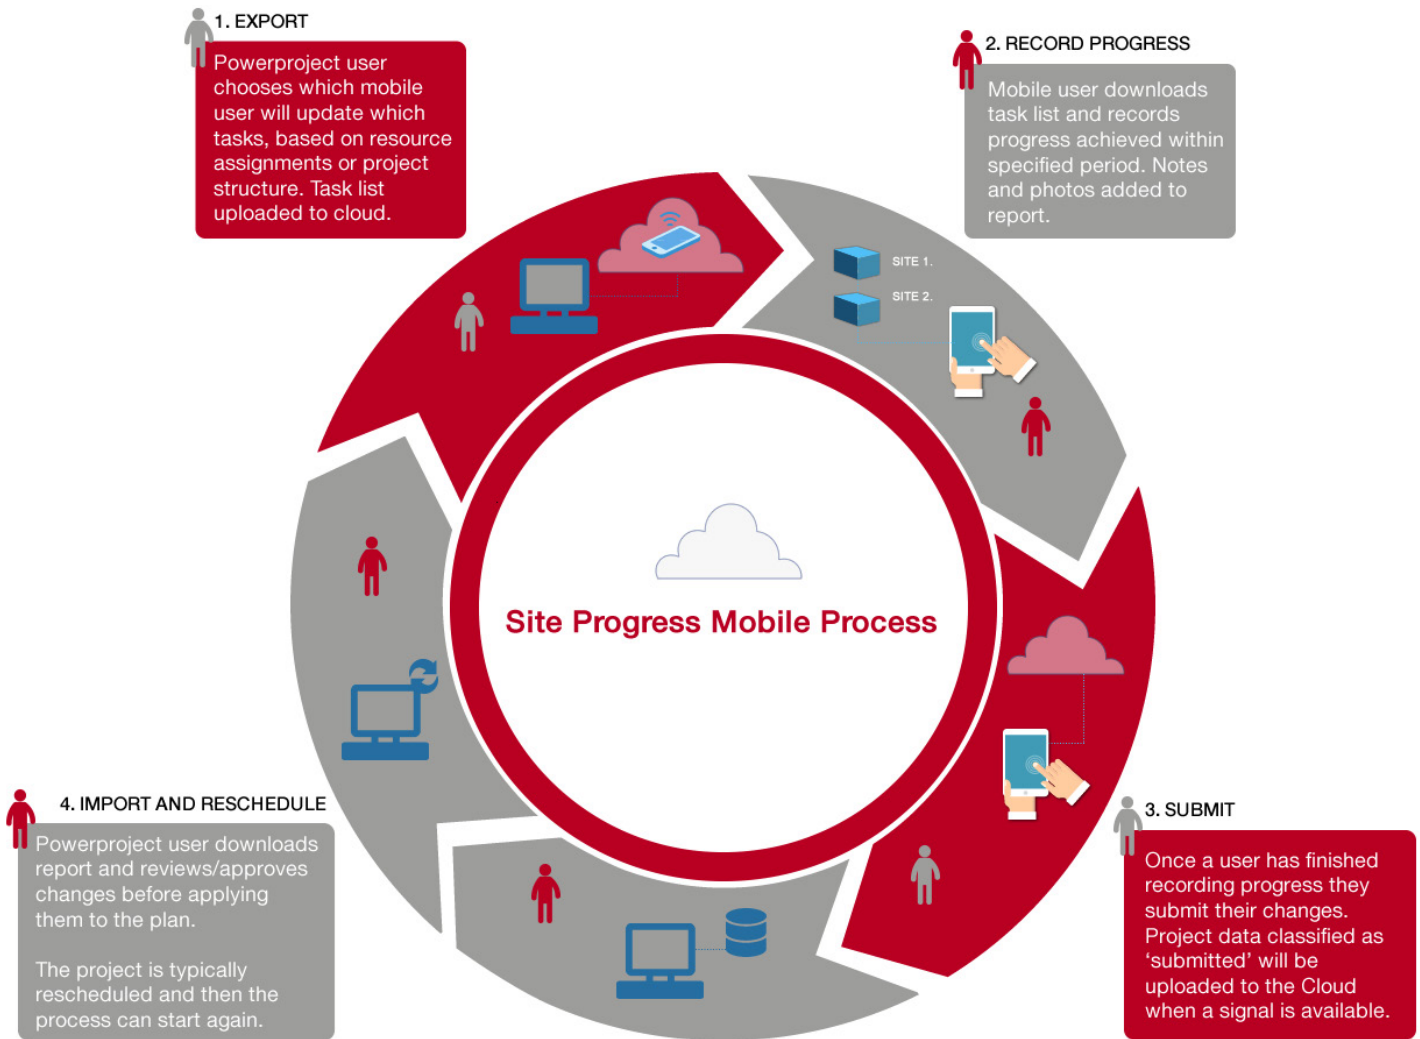

- Update progress at any time, from any location – without having to open Powerproject
- Improve data accuracy by removing the need for re-keying of updates
- Export tasks to mobile devices based on resource assignments
- Record actual start/finish dates, percentage complete and remaining duration
- Review reported progress and approve/reject submission, before applying to programme

Site Progress Mobile is a downloadable app which enables mobile users to record the progress of tasks and repetitive events from a remote location against their work as scheduled in a Powerproject project plan. Each user sees only the relevant tasks and progress check lists for which they have responsibility and is able to add notes and photographs to each task update.

"The beauty of Site Progress Mobile is that the data collected with your phone can be downloaded directly into the programme. It removed a laborious task and the potential for errors from having to input data manually."

Peter Farmer, Senior Planning Engineer, Interserve

How the reporting process works

"The app has been easy to use and we've received support from the outset. I've found it very straightforward to navigate and intuitive."

David Grant, Planner, Balfour Beatty

Administration

Site Progress Mobile licences can be acquired based on the number of mobile users that will be updating project plans at the same time. The annual licence covers the Cloud hosting service and technical support.

The jobs produced are per user and per project. For example, three managers may update different parts of the same project and one of these managers may also update another project – this would contribute four jobs towards the total.

Download the app for FREE

The Site Progress Mobile app is free to install, with the use of the service charged according to the number of active jobs exported to the secure cloud storage area.

Designed to work with **iOS**, **Android** and **Windows** devices. Site Progress Mobile can also be accessed via the web.
