Whether for relaxation, therapy or just good fun, our super-size QuatroSpa is outstanding value-for-money.

Its contours provide smooth, full depth seating and a generous foot well for the most natural resting position. While the reclining therapy seat will provide a unique massage for even the tallest people and entry step offers easy access and doubles as a child seat. The Captain's Seat has a 15 point ultrablast massage jet for the ultimate massaging experience.

Our combination of the latest high-tech spa systems ensure the QuatroSpa is unrivalled in its class for specification, value and durability.

QuatroSpa Specification:

The QuatroSpa has the strength and durability to last a lifetime. It is extremely economical due to its insulated construction. Installation or re-positioning is never a problem as it can be easily rolled, lifted or slid into position by two people. To ensure a uniform and powerful performance the QuatroSpa delivers air and water individually to each jet, at equal pressures. Adjustable, therapeutic, rotating massage jets are strategically positioned to give various massage effects in each seating area. The Captain's Seat 15 point ultrablast master massage jet gives the ultimate back massage. The turbo air injection system adds millions of tiny energising air bubbles to the water – behind your back, around your legs and under your feet – a most invigorating massage.
