

SMW Group is a leading one-vendor supplier and contractor for mining, rail and industrial manufacturing, field maintenance, servicing and fabrication. We are located in Parkhurst, Rockhampton, just one hour from Shoalwater Bay.

SMW provides the complete package, from innovative engineering-led design through to project management and delivery, site-qualified and experienced trade services and full installation and commissioning, plus long-term servicing and maintenance. Our field service teams will attend any site to perform efficient and cost effective repairs, while our workshop is one of the only Rockhampton industrial sites authorised to operate 24/7. We have completed multi-million dollar fabrication, infrastructure and overhaul projects for mining and rail industries, and have easily adaptable capabilities for Defence.

SMW Group are also leaders in robotic welding technology, with our automated plasma cutter and welder providing a complete robotic solution for heavy industry fabrication and manufacturing needs.

CAPABILITIES

- Over 400 qualified tradespeople ready for fabrication and maintenance projects
- Central Queensland's only automated robotic welding cell
- Full undercover mechanical service facility, 2000m2 under roof
- 2500m2 heavy fabrication facility
- 1100m2 abrasive blast and paint facility
- Structural steel fabrication and erection with turnkey project solution capabilities
- Industrial and corporate cleaning services
- Management of world-first pioneering projects, like the Surf Lakes project

DISCRIMINATORS

- Industry-leading approach to innovation and automation
- Ability to design, manufacture, install and service equipment
- The Central Queensland leaders in structural fabrication, installation and project management
- Advanced cost-saving initiatives based on an engineered approach
- Convenient industrial location, with heavy transport access
- Stable company with diversified client base and a range of trades

KEY CUSTOMERS

- BHP Billiton – site services and OHT tray manufacture
- Glencore - onsite maintenance
